

AGRICULTURAL EQUIPMENT & TECHNOLOGY DIRECTORY

Adaptive Agriculture Solutions

332 Packham Avenue
Saskatoon, Saskatchewan S7N 2T1
www.adaptiveagriculture.ca

Adaptive Agriculture Solutions is best known for its thermostatically controlled in-bin grain drying system that uses its patented adapter plate transitions to control the supply of supplemental heat to grain bins. The company's technology has progressed in producing a series of Internet of Things (IoT) sensors attached to a grain bin to improve grain drying efficiencies through computer automation that turns any grain bin into an efficient grain drying and conditioning system. Adaptive Agriculture is headquartered out of Saskatoon, Saskatchewan (Canada), and has clients across the western prairie provinces and into the northern USA.

Products & Services Include:

- Both cellular based and Wifi connected devices for grain bin monitoring and conditioning.
- Binstick
- Bindapt thermostats & devices
- Bindapt adapter plates
- Heating & Ducting
- Aeration
- Portable aeration socks
- Grain bin monitoring cables

Atlas Industries Ltd.

220 Ave J South
Saskatoon, Saskatchewan S7M 2A3
www.atlasindustries.ca

Atlas Industries Ltd. was founded in 1974 on the principles of hard work and integrity above profit. The team of skilled tradespersons, estimators, and administration work together to find solutions for our customers in the industries of mining, construction, and agriculture. Atlas Industries Ltd. worked closely with the agricultural community to develop replacement SS tube kits for air seeders. These long-lasting kits improve performance and replace up to half of the flexihose, lowering maintenance costs.

Products & Services Include:

- Replacement stainless pipe kits for air seeders
- Current designs include Seedmaster, Seedhawk and Bourgault.

Calian Agriculture Ltd.

118 Husum Road
RM of Sherwood, Saskatchewan S4K 0A4
www.intragrain.ca

Calian Agriculture Ltd. develops, commercializes and markets cost effective, innovative grain storage monitoring solutions. This company offers an affordable system that allows grain farmers the ability to monitor stored grain from anywhere in the world, via the internet and mobile phone. This system was developed by engineers in Saskatchewan and is serving the market as an expedient way for grain farmers across Canada and the world to monitor grain temperature and moisture. The BIN-SENSE® product consists of sensor cables that are mounted directly inside each bin, as well as a single master unit to collect and transmit information to their website for secure viewing. The system is battery operated, requiring no external power source, and all information is transmitted wirelessly. Users are notified by text message if or when a drastic temperature change has occurred.

Products & Services Include:

- Fuel Lock™, fuel monitoring and management system.
- BIN-SENSE®, grain storage monitoring system,

Duck Foot Parts Inc.

Site 713 Comp 17 RR7
Saskatoon, Saskatchewan S7K 1N2
www.duckfootparts.ca

Duck Foot Parts Inc. was founded following a Saskatchewan farm innovation looking to solve the problem of combine header loss. The vision was to create a time-efficient and cost-effective solution that would benefit farmers during harvest. The Duck Foot is a 6" paddle tine that quickly and easily slips over the existing tine of a combine header, attaching to the reel pipe and is then further secured by a reusable clip. It feeds crop that standard tines can miss and keeps the cutter bar clean, reducing grain loss and improving yield.

Products & Services Include:

- The Duck Foot, a series of slip-over paddle tines with reusable clips.

X-Steam-inator

X-Steam-inator Agriculture Products Ltd.

PO Box 298
Chaplin, Saskatchewan S0H 0V0
www.xsteaminator.com

X-Steam-inator Agriculture Products (XAP) located at Chaplin, Saskatchewan has developed the X-Steam-inator, a sprayer that uses high temperature steam for non-selective weed control. The company's patented process generates high temperature steam in an energy efficient manner with the ability to precisely control steam temperature, pressure and saturation. XAP has a memorandum of understanding with Honey Bee Manufacturing to build the units. Pre-seed weed control and weed control between crop rows are the first applications being targeted. The technology will have applications for agriculture worldwide.

Products & Services Include:

- The X-Steam-inator
