

ENERGY & MINING DIRECTORY

Saskatchewan  Canada

ABC's mining and tunneling offerings consist of flexible fabric ducting, semi-rigid ducting, engineered inflatable stoppings, high-efficiency fans, silencers, tech services and more. Industrial ducting is manufactured for construction, aviation, military, special events and oil & gas applications. This extensive catalogue is the result of over half a century of research, innovation, and industry experience in more than 50 countries.

Products & Services Include:

- Hardline performance ducting
- Brattice
- Curtains
- Airstop
- Overhead protection
- Epass
- Ventilation Control Solutions
- Silencers
- Flexline performance ducting
- Ventilation Fan Systems
- Toughvent
- Rock Armor Geogrid Mesh

Atlas Industries Ltd. was founded in 1974 on the principles of hard work and integrity above profit. The team of skilled tradespersons, estimators, and administration work together to find solutions for our customers in the industries of mining, construction, and agriculture. They specialize in plate work, custom forming, fabrication and machining.

Products & Services Include:

- Heavy Collars for pipelines
- Stainless steel ducting and stacks
- Raisebore drilling platforms

Axiom Exploration Group is an employee-owned company with its corporate head office located in Saskatoon, Saskatchewan. Established in 2011, Axiom Group is a complete consulting firm providing a diverse set of technical services within, and integrated across, each of the company's four main divisions: Exploration, Geophysics & Geomatics, Environment, and Energy Services.

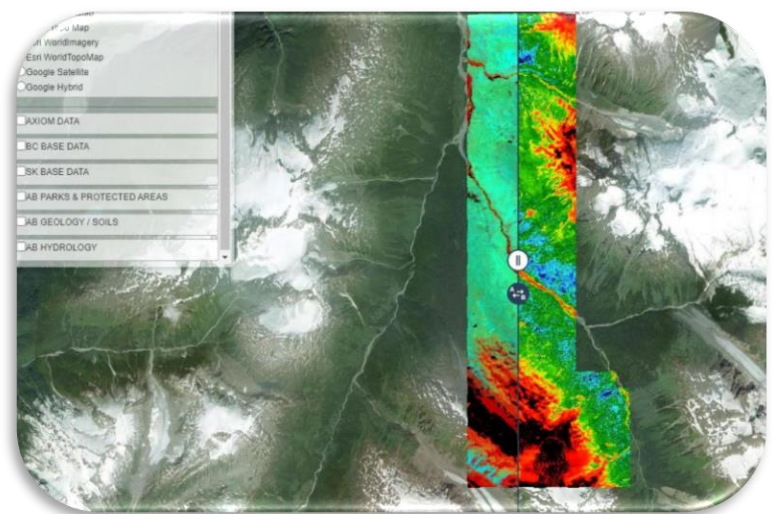

Products & Services Include:

- Geological field services
- Technical reviews & reporting
- Resource modelling & estimation
- Geophysical processing & interpretation
- Synthetic aperture radar analysis
- Sentinel & aster multispectral analysis
- LiDAR
- Photogrammetry
- UAV magnets & helicopter gradiometry
- GPR
- EM
- Project approvals
- Risk Management
- EIAs
- Water resources
- ESAs
- Environmental sustainability & GHG management
- AI & Machine learning analytics
- Wellsite supervision
- HSE management

BrewNature Inc.

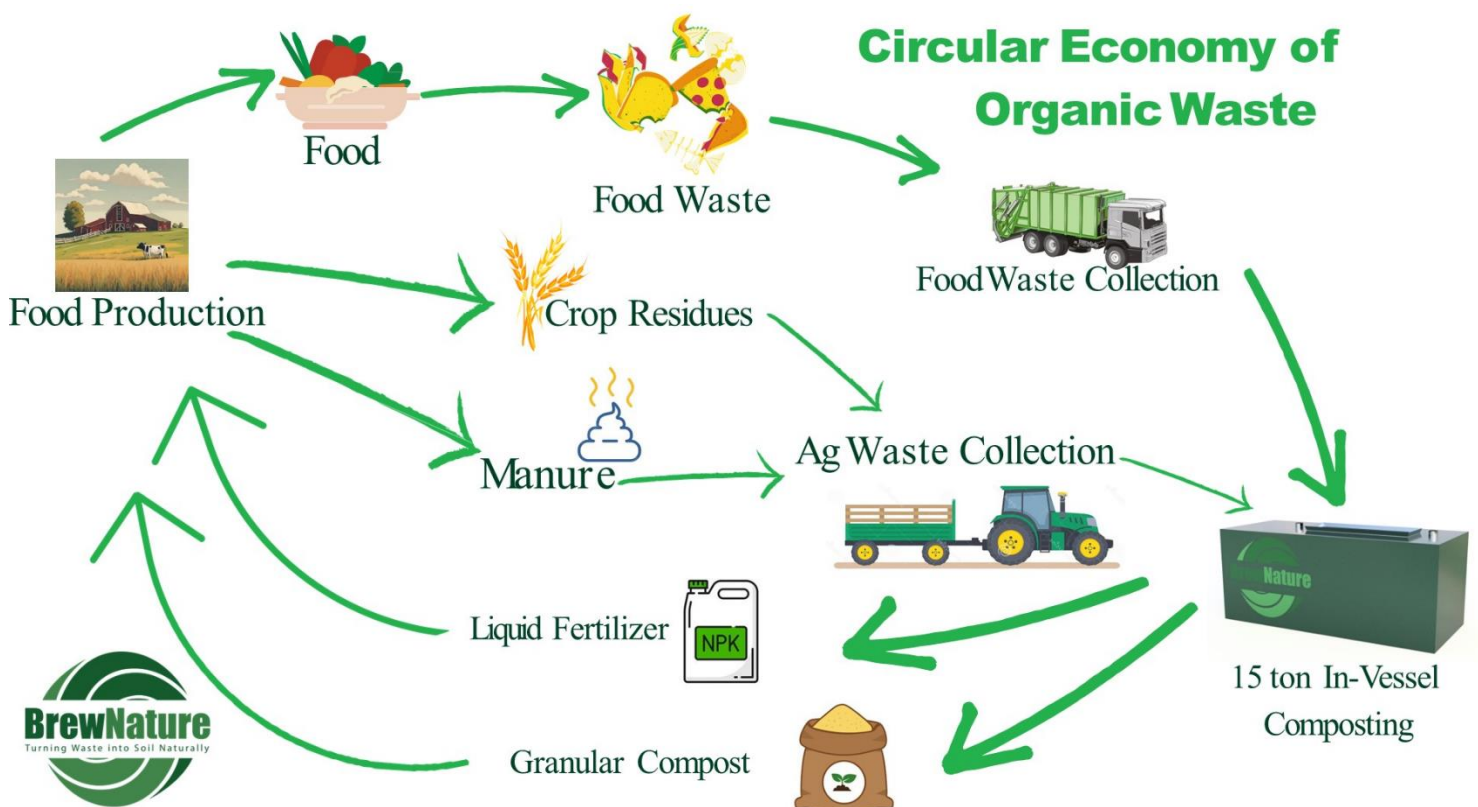

671 Secord Bend
Saskatoon, Saskatchewan S7V 0M7
www.brewnature.ca

BrewNature Technology is designed to help reduce the amount of organic waste that ends up in landfills, which is a major contributor to greenhouse gas emissions worldwide. The BrewNature technology works by accelerating the natural process of composting, which usually takes 5-7 months to complete, down to just 5 days. The process involves breaking down organic waste using a combination of microorganisms and aerobic conditions.

Products & Services Include:

- In-vessel composting from 1 to 15 tonnes units, water treatment and wastewater treatment.

Calian Composites started in 2015 as a research branch of Calian, Advanced Technologies to investigate composite production use in large aperture antennas for the SATCOM industry. Today, Calian Composites has nearly 30,000 ft² of manufacturing space, with over 50 engineering and fabrication staff. Calian Composites is a subsidiary of Calian Ltd. which has offices around the world, including Calian, Advanced Technologies located in Saskatoon.

Products & Services Include:

- Composites-specific engineering, metrology and project planning services, right through to full component prototyping with production of final products and assemblies.
- Calian Composites currently works in the Defence, Marine/Naval and Civil markets and is expanding into Mining and Agriculture as well as general composites such as: kitting and cutting services, pattern and mold making, and rapid composite prototyping.

Canada North Environmental Services Ltd Partnership

211 Wheeler Street
Saskatoon, Saskatchewan S7P 0A4
www.cannorth.com

Canada North Environmental Services (CanNorth) provides a full range of environmental services and is 100% First Nations owned by the Lac La Ronge Indian Band, Saskatchewan's largest band. They provide high quality, cost effective environmental services and since 1981 have completed nearly 2,000 projects, both nationally and internationally. Their clients include the world's largest mining companies, crown corporations, government, and well-established oil and gas companies. CanNorth offers the technical skills and knowledge to deliver solutions for managing environmental risk in ways that benefit their clients, protect the environment, satisfy regulatory requirements, as well as support local communities through employment, training, and economic benefits.

Products & Services Include:

- Environmental impact assessment
- Environmental effects monitoring
- Regulatory and licensing issues
- Human health and ecological risk assessments
- Environmental site assessments
- Aquatic toxicology & fish studies
- Wildlife and vegetation assessments
- Data management and analyses
- Habitat evaluation and restoration
- Archaeology/heritage resources
- forestry

Delta CleanTech Inc. is a leading provider of technology for pre-/post-combustion CO₂ capture from industrial sources, enabling significant and economical reduction of greenhouse gas emissions since 2004.

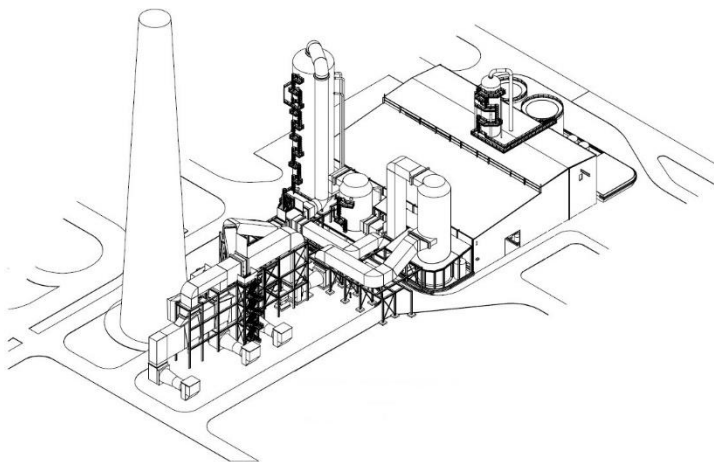

Delta's goal is to deliver practical solutions to reduce greenhouse gas emissions, CO₂ utilization, and help solve the challenges of energy security and transition.

Led by a team of experts in carbon capture, Delta's customers achieve their individual carbon capture goals through precise modeling, scaling, and costing. Delta CleanTech combines its own proprietary patented technologies with a global partnership network to meet aggressive 21st century carbon emission reduction targets.

Products & Services Include:

- Pre-/Post-Combustion Low-Cost Design Carbon Capture Technologies, LCDesign®
- Amine & Glycol Solvent Purification, Delta Reclaimer®
- Business Assessment, Planning Assessment, Conceptual, Feasibility, Pre-FEED, Mini-FEED, & Feed Studies
- Consulting services & supporting
- Training, Education, Research & Development
- Engineering Services (Troubleshooting, Optimization, Evaluation Study, Economical Analysis)

Dias Ground & Airbourne Geophysical Surveys

2131 Airport Drive
Saskatoon, Saskatchewan S7L 7E1
www.diasgeo.com

Dias delivers unique ground and airborne geophysical survey solutions to mineral exploration and other geoscience challenges through proprietary innovative technologies. Dias' induced polarization (IP) and resistivity surveys use its proprietary, efficient and effective DIAS32 system. In addition to its ground surveys and in partnership with Supracon AG of Germany, Dias also provides two highly effective airborne technologies that use SQUID-based sensors. Both ground and airborne technologies provide robust data for 3D models. Dias' head office is in Saskatoon, Canada, with locations in Vancouver, Toronto, Chili and Mexico.

Products & Services Include:

- Next-generation 3D DCIP resistivity and IP surveys using the proprietary DIAS32 system
- Ground MT/CSMAT/AMT surveys using the DIASMT system
- Full-tensor airborne magnetic gradiometry surveys using the QMAGT system
- airborne passive EM (AFMAG) surveys with the QAMT system. (Both airborne systems deliver unparalleled data in the industry due to highly sensitive low-temperature SQUID sensors.)

DryAir Manufacturing Corp.

400 Service Road
St. Brieux, Saskatchewan S0K 3V0
www.dryair.ca

Dryair Manufacturing Corp. is a leading manufacturer of Hydronic Heating (glycol based) equipment, serving the North American market from St. Brieux, Saskatchewan, Canada. The Dryair line of equipment focuses on construction including ground thaw, concrete cure, temporary heating, frost prevention. Dryair products are also used to provide solutions for customers in oil & gas, fire & flood restoration, and agriculture.

Products & Services Include:

- Greenthaw line of towable ground thaw units
- Central heating units (CHU's)
- Powered heat exchangers
- Explosion proof heat exchangers
- Bayonet tank heat exchangers
- Grain drying fan coils
- Desiccant dehumidifiers
- Available fuel sources are diesel, propane, natural gas & steam

As a trusted engineering firm, **Engcomp** is driven to provide clients with innovative solutions to meet complex project needs. Proficient in overseeing and completing projects from conceptual design and feasibility studies to detailed engineering, they also specialize in risk & decision analysis, cost estimating, and project planning. Engcomp provides professional services to the potash, uranium, oil and gas, pulp and paper, chemical processing, and food processing industries. Engcomp executes both greenfield and brownfield projects varying in size and complexity and are well positioned to lead the execution of small to medium scale projects from concept to completion.

Products & Services Include:

- Mining Engineering
- Risk & decision analysis
- Project management
- Mechanical engineering
- Structural engineering & assessments
- Process engineering
- Cost engineering
- Electric engineering
- Independent project review and audits

Enviro Integration Strategies is sparking a mine waste revolution, focused on reducing the risk of costly and dangerous mining waste failures, finding ways to create value through mining circularity, and helping mining executives make proactive, safer decisions. The company is developing innovative software specifically designed to comply with global waste management standards and produce transparent performance disclosures. EIS will work hand-in-hand with their client's teams to reduce their waste management risks and to facilitate a shift in operating culture where resilient and responsible practices become the norm.

Products & Services Include:

- Their risk evaluation software provides governance assurance, giving you a proactive look at the quality of past work done, to know if the site is well understood, the design and analysis were rigorous enough, and if the facilities were built and are being operated according to design. Having this information in one place is critical to diagnosing gaps and developing remedial plans, to lower the potential of a facility failure.

ENVIRONMENTAL
MATERIAL
SCIENCE INC.

Environmental Material Science Inc. (EMS)

3038 Faithful Avenue
Saskatoon, Saskatchewan S7K 0B1
www.ems-inc.ca

EMS provides hardware and software services that allow for companies to monitor and reduce soil hydrocarbons as well as monitor carbon sequestration, and greenhouse gas emissions. EMS has been in business since 2019 and is currently operating across AB and SK. EMS uses a data-driven approach to detect and treat hydrocarbon contamination. They place remote sensors into the ground and the data is livestreamed every 30 minutes to a dashboard. The data is analyzed and a biolodestone is formulated to determine a tailored blend of macro and micronutrients. This accelerates the microorganism activity tenfold for a quicker remediation time. The nutrients are inserted into the soil using a solar-powered, remote-operated compact (2'x3'x3') Distributor that does not require water tanks or generator.

Products & Services Include:

- SoilSense
- Distributor

Greenwave Innovations

649 Solomon Cres, Unit B
Regina, Saskatchewan S4N 6H9
www.greenwaveinnovations.ca

Greenwave Innovations is an industry leader in providing energy management solutions and services within all types of buildings across Canada. Their data-driven approach utilizes permanently installed electrical, natural gas and water sub-monitoring hardware in combination with our patent-protected software in order to continually reduce utility bills and greenhouse gas (GHG) emissions. They create long-term partnerships guiding customers through a sequential, ROI-based energy conservation process. With data, informed energy efficiency decisions are always made, as utility savings and emission reduction results are known prior to capital investments. At Greenwave, they enable responsible companies and public entities to produce economic-based, environmental results ... the ultimate win-win scenario!

Products & Services Include:

- Custom design, supply, install and commission non-intrusive, maintenance-free electrical, natural gas and water sub-monitoring systems.
- Access to real-time data and historical performance reports
- Consulting & Analytic Services

Legacy Watercare is creating a safer, cleaner water future for industry by offering accelerated standards of water clarification for wastewater treatment plants in municipal and industrial customers. They provide system products, clarification equipment and maintenance contracts to their clients.

Products & Services Include:

- An application specific, chemistry mixing system that analyzes effluent in real time, to customize chemistry prescriptions and dosing volumes before the effluent enters their novel clarification process. The clarification reactor is a fully contained, pressurized separation vessel that flows high volumes of wastewater. Legacy Water Care's process creates efficiencies, resulting in cost savings and creating safer working environments for operators with remotes monitoring and water analytics.

Magnum Fabricating Ltd.

PO Box 1535 | 113 Hwy 21 North
Maple Creek, Saskatchewan S0N 1N0
www.magnumfabricating.com

Magnum Fabricating Ltd. is a metal fabrication manufacturer and welding shop located in Maple Creek, Saskatchewan. They manufacture above ground storage tanks (ULC 601, UL 142), single wall, double wall, horizontal, vertical tanks, up to 200,000 liters of volume and transport Canada in 31/a fuel tanks for transport of gas, diesel, etc. up to 4,500 liters.

Products & Services Include:

- Cattle Handling Equipment
- Oilfield Fencing
- Texas Gates
- Oil Tanks
- Fuel Tanks & Fuel Skids
- Transport Canada in 31/a fuel tanks for transport of gas, diesel, etc.

MAVEN
WATER & ENVIRONMENT

Maven Water & Environment

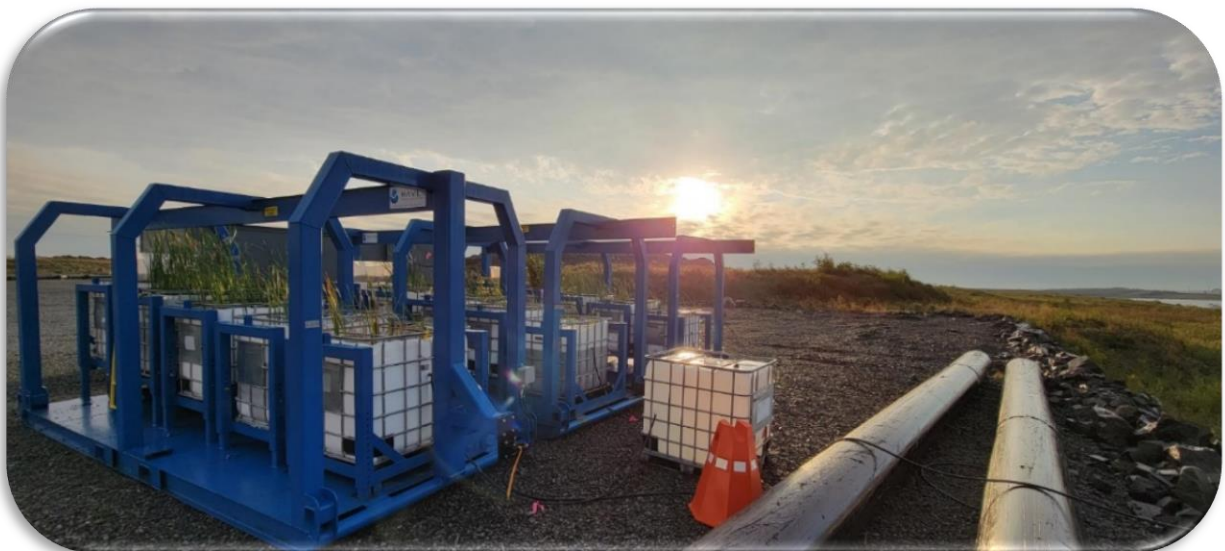

103-303 Wellman Lane
Saskatoon, Saskatchewan S7T 0J1
www.mavenwe.com

Maven Water & Environment believes in a sustainable future, where clean energy and products are produced with minimal impact to water and the environment. The mining and oil and gas sectors produce many materials critical to the advancement and application of clean energy. By empowering people and applying technology, we have developed a range of natural and powerful water treatment and source control technologies that can ensure our water resources remain safe while sourcing the materials needed for a sustainable future.

Products & Services Include:

- Assessing site-specific needs, and recommend the best combination of treatment technologies, management strategies, and source control opportunities. Their experts offer passive and semi-passive and biological water treatment technologies such as treatment wetlands (CWTS), gravel bed reactors, bioreactors (BCRs), etc. Through strategic collaborations with experts in active treatment, our toolbox spans a wide range of active technologies (e.g., reverse osmosis, ultrafiltration, lime precipitation, ion exchange, etc).

MMKL Group

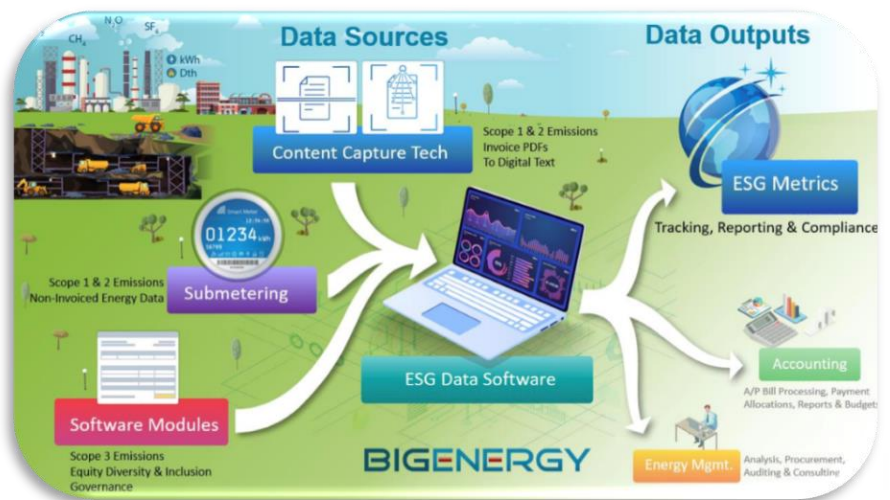

5-3919 Brodsky Ave
 Saskatoon, Saskatchewan S7P 0C9
 www.mmklgroup.com

MMKL offers a range of products and services in industrial, environmental, and technology solutions. Their customers choose them for their cost-effective prices and their ability to find hard-to-find products that are not readily available in standard distribution channels. MMKL Group is committed to supporting Indigenous businesses and communities, and their partnerships with organizations like Superior Strategies help them to provide solutions that are Indigenous-owned and managed. At MMKL, they use innovative approaches to create employment opportunities in Indigenous communities. They believe in making a positive impact on society, and supporting Indigenous businesses and communities is a key part of their mission.

Products & Services Include:

- Technology for the mining industry such as preventative maintenance, safety, fire prevention, inventory management, IT PPE including gloves, hard hats, small tools and workwear.
- They also provide gas detection bio remediation fire prevention tools and suppressants.

myComply helps blue-collar industries track workforce activity and verify the presence of qualified personnel. myComply's cloud-based software and integrated IoT hardware solutions help to ensure that each worker meets specific site requirements, like proper documentation, completion of orientation, and up-to-date safety training. Ensure a 100% qualified workforce on your job sites with myComply.

Products & Services Include:

- Provides IoT hardware and cloud-based software to blue-collar industries, like construction, mining, and manufacturing. The hardware component is built to track time/attendance, manpower, control access to the site, and verify qualified individuals. The software component is utilized to ensure that all subcontractors (and their workers) have completed the proper onboarding and are vetted for site requirements like safety certifications, licenses, training, and orientation.

Petroleum Technology Research Centre (PTRC)

Suite 220 - 6 Research Drive
Regina, Saskatchewan S4S 7J7
www.ptrc.ca

The Petroleum Technology Research Centre (PTRC) is a non-profit R&D corporation founded in 1998 by Natural Resources Canada, Saskatchewan Ministry of Energy and Resources, the University of Regina and the Saskatchewan Research Council. The PTRC uses R&D to advance and support the recovery of Canada's rich but often difficult to access oil resources. The PTRC is committed to conducting research that will help the petroleum industry implement sustainable technologies that minimize environmental impacts, such as climate change caused by greenhouse gas emissions, while maximizing oil recovery. Many of the PTRC's projects also hold potential for minimizing water use and reducing land impacts of oil recovery.

Products & Services Include:

- Managing of the world's largest CO2 Storage Project (IEA GHG Weyburn-Midale CO2 Monitoring and Storage Project)
- Managing potentially the world's largest avoided CO2 emissions project (JIVE Project)
- Advancing enhanced oil recovery technologies through a newly established Business-Led Network of Centres of Excellence (Sustainable Technologies for Energy Production Systems, or STEPS)
- Managing Western Canada's first integrated CO2 capture, transportation, injection and storage project involving the injection of CO2 into a deep saline formation (Aquistore).
- Directing research in an investigation of fluids and their locations in the Saskatchewan subsurface (Saskatchewan Phanerozoic Fluids and Petroleum Systems)

www.prairiecleanenergy.com

Pressure Corp provides industrial facilities and the distributors and operators of pipelines a revenue-positive Scope 1 and 2 emission-reduction solution by transforming their waste pressure into clean energy. We leverage proven technology for our waste pressure power system and third-party capital to eliminate the technical and financial risk for our host customers. Pressure Corp enables our host customers to focus on their core business while adding to their bottom line and achieving a critical Environmental, Social, and Corporate Governance (ESG) objective - reducing emissions.

Products & Services Include:

- A revenue-positive scope 1 and 2 emission-reduction solution that transforms pipeline waste pressure into clean energy. They leverage proven technology for their waste pressure power system and third-party capital to eliminate the technical and financial risk for their host customers.

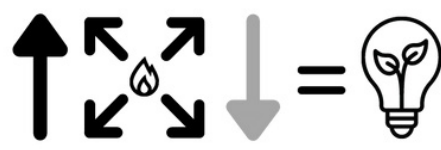

Jay Brown, Partner
 jbrown@pressurecorp.com
 1-306-280-3750

Gas is transported via pipelines at **high pressure**.

For industrial use, facilities drop the gas to a **lower pressure**.

As the pressure drops and the gas expands, **wasted mechanical energy** can be transformed into **clean electricity**.
