

GOVERNMENT PROCUREMENT DIRECTORY

Saskatchewan  Canada

ABC's mining and tunneling offerings consist of flexible fabric ducting, semi-rigid ducting, engineered inflatable stoppings, high-efficiency fans, silencers, tech services and more. Industrial ducting is manufactured for construction, aviation, military, special events and oil & gas applications. This extensive catalogue is the result of over half a century of research, innovation, and industry experience in more than 50 countries.

Products & Services Include:

- Hardline performance ducting
- Brattice
- Curtains
- Airstop
- Overhead protection
- Epass
- Ventilation Control Solutions
- Silencers
- Flexline performance ducting
- Ventilation Fan Systems
- Toughvent
- Rock Armor Geogrid Mesh

Calian Agriculture Ltd.

118 Husum Road
RM of Sherwood, Saskatchewan S4K 0A4
www.intragrain.ca

Calian Agriculture Ltd. develops, commercializes and markets cost effective, innovative grain storage monitoring solutions. This company offers an affordable system that allows grain farmers the ability to monitor stored grain from anywhere in the world, via the internet and mobile phone. This system was developed by engineers in Saskatchewan and is serving the market as an expedient way for grain farmers across Canada and the world to monitor grain temperature and moisture. The BIN-SENSE® product consists of sensor cables that are mounted directly inside each bin, as well as a single master unit to collect and transmit information to their website for secure viewing. The system is battery operated, requiring no external power source, and all information is transmitted wirelessly. Users are notified by text message if or when a drastic temperature change has occurred.

Products & Services Include:

- Fuel Lock™, fuel monitoring and management system.
- BIN-SENSE®, grain storage monitoring system,

Dias Ground & Airbourne Geophysical Surveys

2131 Airport Drive
Saskatoon, Saskatchewan S7L 7E1
www.diasgeo.com

Dias delivers unique ground and airborne geophysical survey solutions to mineral exploration and other geoscience challenges through proprietary innovative technologies. Dias' induced polarization (IP) and resistivity surveys use its proprietary, efficient and effective DIAS32 system. In addition to its ground surveys and in partnership with Supracon AG of Germany, Dias also provides two highly effective airborne technologies that use SQUID-based sensors. Both ground and airborne technologies provide robust data for 3D models. Dias' head office is in Saskatoon, Canada, with locations in Vancouver, Toronto, Chili and Mexico.

Products & Services Include:

- Next-generation 3D DCIP resistivity and IP surveys using the proprietary DIAS32 system
- Ground MT/CSMAT/AMT surveys using the DIASMT system
- Full-tensor airborne magnetic gradiometry surveys using the QMAGT system
- airborne passive EM (AFMAG) surveys with the QAMT system. (Both airborne systems deliver unparalleled data in the industry due to highly sensitive low-temperature SQUID sensors.)

Limbus AI is a software company focused on the development of products designed to improve efficiency in cancer diagnosis, treatment and follow-up. Limbus Contour, the company's first product, utilizes machine learning models to perform accurate and fast segmentation of organs at risk - a critical component of radiotherapy treatment planning. The product is simple to use, integrates with any planning platform, and produces high quality contours.

Products & Services Include:

- Limbus Contour

Romel Canlas, Clinical Account Manager
info@limbus.ai
1-833-668-0077

**Easy to Setup**

AI contours up and running in minutes with your existing treatment planning system.

**Setup in Minutes**

Get automatic contouring up and running in less than an hour. Create Templates and customize contour metadata to match your treatment protocols. Configure Limbus Contour to detect the correct treatment site and apply the appropriate Template for planning.

**Vendor Neutral**

Contours exported as compliant DICOM RT-Structure files. Supports a wide variety of treatment planning systems. No plug-ins or extensions needed.

**Supported Platforms**

Supports Windows (7 and above) and MacOS (10.14+). No GPU required. One click install on an existing workstation. No cloud, no patient data privacy concerns.

Full Automation

CT images processed immediately after each scan. Limbus Contour detects and applies the correct clinical template, and sends the contours to the treatment planning system for manual review.

Customize Your Evaluation Template

Your evaluation template is the most important tool to get right before you organize an event. You have full control of evaluation categories, scoring ranges, weighting and much more.

Create your template from scratch

Build your athlete assessment from scratch and completely customize your evaluations.

Start from a pre-built template

Select one of our professional vetted sports templates and customize it for your needs.

By taking away administrative tasks, more time can be spent developing successful athletes and winning teams.

Chris Shewfelt

Vice President, Toronto FC & Toronto Argonauts

SuperiorRoads Solutions manufactures Python self-propelled pothole patchers that represent a whole new way of keeping roads in good repair. Don't wait until potholes are large enough to send out a crew to repair them and your road starts to crumble. Instead, a single operator in a Python can be out all year round making long-lasting repairs in under two minutes – saving money and extending the life of your roads.

Products & Services Include:

- The Python 5000 and 5000+ Pothole Patchers
