October 28 – November 6, 2024
<https://imarcglobal.com/>
Perth & Sydney Australia

Event Description: Australia is an important market with significant ties to the Canadian, and Saskatchewan mining industry. The International Mining Resources Conference & Expo (IMARC) is a growing event, with 9,000 attendees and 800 mining companies from 120 countries taking part. In 2024, STEP will walk the show floor, attend networking events, B2B meetings at the show, and take part in off-site programming such as mine tours and industry meetings.

The draft agenda is as follows:

Monday October 28th: Briefing Session in Sydney. Presentation by a local mining company and Canadian companies that have already made inroads into the Australia market. There will be an evening reception hosted by the Association of Mining and Exploration Companies (AMEC). Their membership includes over 330 mining and exploration companies and about 175 suppliers.

Tuesday October 29th: IMARC tradeshow, B2B program. Cleantech in Mining Roundtable

Wednesday October 30th: IMARC tradeshow, B2B program. The TSX may host a reception for the Canadian delegation

Thursday October 31st: IMARC tradeshow, B2B program

Friday November 1st: Field trip to mine site near Sydney

Saturday November 2nd and Sunday November 3rd: Free time other than traveling to Perth

Monday November 4th: Mine tour in the Perth region. There will also be an Austmine reception on Monday evening

Tuesday November 5th: Meetings and site visits in Perth with mining companies, Tier 1 suppliers and EPCM companies

Wednesday November 6th: Participants depart Perth for home

Australia is the 4th largest producer of uranium and 12th of potash. The Mardie Salt Potash Project is located in Western Australia. This solar evaporation project will be the first major salt project developed in Australia in over 20 years. BHP owns Olympic Dam in South Australia, one of the world's most significant deposits of copper, gold and uranium. Australia has over 350 operating mines and is one of the world leaders in bauxite, iron ore, lithium, gold, lead, diamonds, REEs, uranium and zinc. Meetings with mining companies will be targeted. Meetings with potential partners in the country will also be targeted as this is key for this market.

I am interested in the entire trip as it stands (Perth + Sydney + IMARC Show in Sydney)

I am only interested in walking the IMARC show, not attending any of the outreach in Perth or any other city

Company Name:

Participant Name(s) / Title(s):

Tel. Number(s):

E-mail(s):

On behalf of my company, I agree to participate in this trade mission in the selected capacity above. I understand if my company can no longer attend this mission, we are responsible for any costs incurred by STEP on our behalf unless a replacement participant is found.
