About this Directory

With over 40% of Canada's cultivated farmland, Saskatchewan is in a unique position to sustainably produce safe, high-quality agri-food products and ingredients.

We have a vibrant food and beverage processing industry meeting growing food demand worldwide, including commercial-scale canola crushing and pulse processing operations. As a global leader in exporting agri-food products and the use of innovative, sustainable farming practices, Saskatchewan is primed to feed the world for generations.

If you would like a direct introduction to any of the listed companies, please contact the STEP team member listed on this page and they will be happy to facilitate the introduction.

Launched in 2012, Agrocorp Processing Ltd (APL) is headquartered in Moose Jaw, SK and is a wholly owned subsidiary of Agrocorp International. With its corporate office in Winnipeg, APL has 4 grain elevators and 1 protein extraction plant. Located in Moose Jaw and Cut Knife in Saskatchewan and Fahler and Innisfail in Alberta, the grain elevators have a combined 500,000MT export capacity for pulses such as lentils, peas, chickpeas, wheat, flax and canola. The protein extraction plant, located in Cut Knife processes pulses such as peas and lentils into protein and starch. All our facilities have the relevant safety and quality certifications. In addition to this, Agrocorp procures more than 1.5m additional tons of pulses, wheat and canola from Canada each year as part of its bulk shipment program. Headquartered in Singapore, Agrocorp operates in 16 countries, moves more than 12.5m MT of goods annually against sales in excess of USD 3.5b USD. In 2020, the company also launched a retail arm, Sansar & HerbYvore. Agrocorp recently launched its plant-based food line, HerbYvore.

Products & Services

Peas, lentils, oilseeds and grains as well as pea protein, starch and hull fibre.

AGT Food and Ingredients Inc. (AGT Foods) is a global leader in plant-based proteins and value-added processing of pulses, grains, staple foods and ingredients for export and domestic markets. AGT Foods was founded on the principle “From Producer to the World”, buying pulses such as lentils, peas, chickpeas and beans, durum wheat, grains, oilseeds and specialty crops from farmers around its facilities in Canada, Türkiye, the U.S., Australia, South Africa, India, China and Europe and processing and exporting its products to over one hundred countries around the world through its Saskcan and AGT Foods brands. AGT Foods operates production facilities across Western Canada as well as across the globe that features cleaning, calibration, peeling, splitting, colour sorting on a full line of pulses, durum wheat, wheat and grains, oilseeds, specialty crops and staple foods for containerized and bulk loading shipments. AGT Foods also produces a full range of plant-based PulsePlus™ food ingredient flours, proteins, starches and fibres through its pulse ingredient production facility in the United States.

Products & Services

Bulk pulses (split and whole lentils, chickpeas, peas, beans), pulse ingredients (flour, protein, starch and fibre), finished pulse goods including texturized pulse proteins, pulse-based pastas (including Veggipasta) and pulse-based breadings systems (including Veggicrumb), as well as wheat, durum wheat, canola and oilseeds, feed barley and specialty crops. Technical services centered on pulse research and development in food and industrial applications are also available.

Algorithm produces ocean-friendly, vegan Omega-3 ingredients derived from micro-algae. The company's unique DHA-rich strain was wild-sourced in the Bay of Fundy, Nova Scotia and is processed in Canada using a proprietary, solvent-free, water-based extraction method. Not only are our products plant-based, non-GMO and kosher, they are free of pollutants such as pesticides, heavy metals and microplastics that can be found in fish and fish oils. Algorithm's focus is the production of functional ingredients for use in supplements, nutraceuticals, food, beverages and childhood/infant nutrition products. They strive to make the consumption of Omega-3s easy, enjoyable and eco-friendly through their patented processes, innovative delivery methods and novel applications. In addition to production and sales expertise, Algorithm offers clients service in the areas of custom formulation, novel application, marketing, co-manufacturing and private labeling.

Products & Services

Alphamega3 algal Omega-3 oils, betamega3 algal Omega-3 powders, thetamega3 Omega-3 concentrate oils and gammamega3 algal Omega-3 emulsions.

Atare was born out of my desire to reconnect with my West African culinary upbringing while residing in prairie Canada. The traditional West African food culture centers around nourishment, minimal processing, conservation through a holistic approach to ingredient use, and the communal experience of shared meals.

Embark on a Flavorful Journey with us! Atare Foods is a Canadian food company that draws inspiration from the diverse and vibrant flavors of West Africa.

At the heart of our journey is a deep-rooted passion for food and a commitment to making diverse and nourishing flavors accessible to everyone. It all began with a vision: to share the genuine essence of this extraordinary region with the world. Our products are crafted using top-quality ingredients and traditional techniques, ensuring that each bite is a true flavor experience.

Products & Services

Atasu chilli oil (Bold, flavor-packed, and fiery, Atasu is the versatile chili-oil condiment for your pantry) Jollof Now (Slowly stewed blend of tree ripened tomatoes, peppers, and onions. Delicious foundation for many dishes) Sweet Plantain chips (Delicious, gluten & added sugar free, with only 3 ingredients. Hand crafted to satisfy sweet and salty cravings with a satisfying crunch.)

Blue Sky Hemp Ventures Ltd. was incorporated in 2017 to pursue commercial opportunities for industrial hemp. The company's goal is to become a global leader in hemp processing and, in doing so, improve the planet and deliver value to their farming partners. Blue Sky Hemp Ventures aim to deliver on those goals through a focus on full plant utilization, dedication to being a low cost producer, partnerships and targeted innovation. As Blue Sky Hemp Ventures is a full plant industrial hemp supplier, they focus on the three value chains of the industrial hemp plant, food, flower, and fiber. The company partners with local Saskatchewan farmers to grow their hemp and be processed in their new state of the art facility built out to GFSI and GMP standards. The company currently offers bulk hemp ingredients in the form of hulled hemp, hemp protein, and hempseed oil in conventional and organic varieties. Blue Sky has also been approved for their ACMPR license with Health Canada in order to process bulk CBD ingredients.

Products & Services

Varieties of hemp food, hulled hempseed, hemp protein in various concentrations. They offer CBD materials and are also open to toll process biomass. They also have conventional whole flax, milled flax, flax flour, defatted flax, flax oil, oat groats, rolled oats, quick oats, oat flour, oat fiber, oat base, fava beans, fava bean protein, fava bean starch, fava bean flour, and other lentils.

m.gobeil@infrareadyproducts.com

Since 1994 InfraReady Products has been manufacturing ingredients with a focus on convenience, functionality, and flavor. Through the application of infrared cooking and subsequent flaking, cracking, milling technologies and consolidating into multigrain blends, they produce ingredients that are ready to use in a variety of applications. Exposure to infrared energy and the alteration of the physical form (flaking/cracking/milling) reduces cooking times and processing requirements; all while retaining the nutritional properties of the raw product without the loss of nutrients. InfraReady's quest as an industrial food ingredient supplier is clear: they enable food manufacturers to profit from over 250 unique whole grain ingredients. As the name suggests, InfraReady uses "infra- red" cooking technology to make products "ready". Their success in domestic and export markets is measured by their client's ability to create and keep customers who desire and benefit from the consumption of whole grains. As a BRCGS accredited company, food safety programs are a prerequisite, however, creativity and innovation are how they achieve "The Good We Get from Grain™"

Products & Services

Organic, conventional, kosher and halal precooked cereals, pulses, grains and oilseeds as flakes, meals, flours and multigrain blends.

Marquis Milling and grain was incorporated March 2016 to facilitate the purchase of Nunweiler's Flour Co. which was established in 1988. The company's production facility is located in Hague Saskatchewan and built in 2019. They are a whole grain flour mill, who mills most kinds of cereals and pulses. They can remove some of the bran to offer a light or almost white versions of flour. They can package grains and flours into packages ranging between 500 grams to 1000 KG. Marquis Milling and Grain's whole grain flours are milled at low temperatures (typically less than 25C) from high quality Canadian grown grains. No additives or preservatives, No GMO's. Superior quality for optimal nutrition. They are active in the Canadian retail channel and food service channel with the premium Nunweiler's Flour brand. Certifications: FSSC22000, Organic, Kosher.

Products & Services

Organic hard red spring wheat flour, organic soft white wheat flour, organic rye flour, organic spelt flour, organic buckwheat flour, organic kamut flour, organic millet flour and organic lentil flour, conventional fine barley flour, and conventional lentil flour. They can also custom mix/blend and package your dry mixes. Private label and toll milling services.

Mark Wagner,
Supply Chain Manager
+1 306 533 3959
mark.wagner@secamelina.com

Smart Earth Camelina Corp. is the world's first and only fully integrated producer of Camelina. Smart Earth controls the entire production process from their proprietary Non-GMO seed variety to the grower's field and on to the processor. This ensures full traceability from farm to customer. The company is Saskatoon-based, operating in the heart of North America's oilseed production region. Smart Earth work with the world's leading experts in oilseed breeding, agronomics and processing to deliver high quality Camelina at scale. Camelina is a highly sustainable source of omega 3. It can be produced on marginal lands and uses less water, fertilizers and chemicals as compared to other commonly produced oilseed crops such as flax and canola.

Products & Services

Camelina meal and oil products for the companion animal (food grade) and feed market from tote to rail car quantities. Smart Earth Camelina Oil is a high omega 3 oil at 38%, that also offers the ideal balance of omega 3 to 6 (2:1). These two features found together in one oil is what makes camelina stand out among omega oils. Its naturally occurring vitamin E provides antioxidant protection while also stabilizing the oil. Camelina has a 2-3 year shelf life, with low risk of oxidation rancidity.

Wendell Estate Honey (WEH) sells premium, raw, artisan honey sourced from a single honey farm. Established by John Wendell in the 1930's, Wendell Honey remains family-owned, but has evolved into a modern honey producer. Wendell Honey selects and breeds their own bee stock and intensively manages their hives to maintain the health of their bees for optimum honey production. Every drop of Wendell Estate Honey is harvested on Wendell Honey Farm, packaged fresh on the farm and allowed to naturally micro-crystallize in the jar. Nothing is added and nothing is removed from the natural prairie blossom honey.

Products & Services

Retail and bulk premium honey produced by Wendell Honey Farm. They also sell organic honey for retail sales.
