About this Directory

With over 40% of Canada's cultivated farmland, Saskatchewan is in a unique position to sustainably produce safe, high-quality agri-food products and ingredients.

We have a vibrant food and beverage processing industry meeting growing food demand worldwide, including commercial-scale canola crushing and pulse processing operations. As a global leader in exporting agri-food products and the use of innovative, sustainable farming practices, Saskatchewan is primed to feed the world for generations.

If you would like a direct introduction to any of the listed companies, please contact the STEP team member listed on this page and they will be happy to facilitate the introduction.

Launched in 2012, Agrocorp Processing Ltd (APL) is headquartered in Moose Jaw, SK and is a wholly owned subsidiary of Agrocorp International. With its corporate office in Winnipeg, APL has 4 grain elevators and 1 protein extraction plant. Located in Moose Jaw and Cut Knife in Saskatchewan and Fahler and Innisfail in Alberta, the grain elevators have a combined 500,000MT export capacity for pulses such as lentils, peas, chickpeas, wheat, flax and canola. The protein extraction plant, located in Cut Knife processes pulses such as peas and lentils into protein and starch. All our facilities have the relevant safety and quality certifications. In addition to this, Agrocorp procures more than 1.5m additional tons of pulses, wheat and canola from Canada each year as part of its bulk shipment program. Headquartered in Singapore, Agrocorp operates in 16 countries, moves more than 12.5m MT of goods annually against sales in excess of USD 3.5b USD. In 2020, the company also launched a retail arm, Sansar & HerbYvore. Agrocorp recently launched its plant-based food line, HerbYvore.

Products & Services

Peas, lentils, oilseeds and grains as well as pea protein, starch and hull fibre.

gwingfield@blueskyhempventures.com

Blue Sky Hemp Ventures Ltd. was incorporated in 2017 to pursue commercial opportunities for industrial hemp. The company's goal is to become a global leader in hemp processing and, in doing so, improve the planet and deliver value to their farming partners. Blue Sky Hemp Ventures aim to deliver on those goals through a focus on full plant utilization, dedication to being a low cost producer, partnerships and targeted innovation. As Blue Sky Hemp Ventures is a full plant industrial hemp supplier, they focus on the three value chains of the industrial hemp plant, food, flower, and fiber. The company partners with local Saskatchewan farmers to grow their hemp and be processed in their new state of the art facility built out to GFSI and GMP standards. The company currently offers bulk hemp ingredients in the form of hulled hemp, hemp protein, and hempseed oil in conventional and organic varieties. Blue Sky has also been approved for their ACMPR license with Health Canada in order to process bulk CBD ingredients.

Products & Services

Varieties of hemp food, hulled hempseed, hemp protein in various concentrations. They offer CBD materials and are also open to toll process biomass. They also have conventional whole flax, milled flax, flax flour, defatted flax, flax oil, oat groats, rolled oats, quick oats, oat flour, oat fiber, oat base, fava beans, fava bean protein, fava bean starch, fava bean flour, and other lentils.

Dandilee Spice Corp. (DSC), owned and operated by Colby Busche, is an exporter of Coriander, Caraway, Flax and Mustard. DSC offers these commodities in specified quality, grade, packaging and quantity depending on customer's needs. Dandilee Spice Corp. sources all products from approved suppliers from all areas of Western Canada. The product is cleaned and packaged at an ISO 22000:2005 certified cleaning facility, before being delivered to customers' specified destinations, all at competitive pricing. DSC strives to exceed customer expectations with products of the best quality, timely delivery and fulfilling customers' over all requirements, while ensuring the process is as easy and hassle free to customers as possible. DSC has recently opened a new facility that offers a heat treatment process that uses no chemicals, does not involve irradiation, radiation or noxious gases. This is a natural process that is capable of obtaining a safe reduction in salmonella, e-coli, SPC, coliforms, yeast and mold without requiring special labeling of the product. DSC is currently following HACCP principles within the new facility and working towards becoming BRC Certified. DSC can offer customers a safe reliable product.

Monette Farms LTD will be launching their first ever non-profit pilot project, Mission Hope.

We are very excited to publicly announce that we have partnered up with six amazing like-minded charitable organizations that not only share the same goals as us but also the drive and selflessness for giving back to others.

Mission Hope will be that hope of extra funding to those that need it most and where it will be utilized best to benefit the brave and less fortunate.

Monette Farms carefully identified organizations that serves the local community, nationally and internationally. As our North American footprint grows, we believe these organizations serving the local and abroad communities aligns with the core values we implement on our farm and the success thereof.

Mission Hope will be donating the profits of 320 acres cropland to these beneficiaries so they can continue the amazing work they do for others. The 320 acres consists of 160 acres Canola crop and 160 acres Durum crop. The 160 acres of Canola is located at our Swift Current location and the 160 acres of Durum crop is located at our Regina location.

www.smartearthcamelina.ca

Contact

Mark Wagner,
Supply Chain Manager
+1 306 533 3959
mark.wagner@secamelina.com

Smart Earth Camelina Corp. is the world's first and only fully integrated producer of Camelina. Smart Earth controls the entire production process from their proprietary Non-GMO seed variety to the grower's field and on to the processor. This ensures full traceability from farm to customer. The company is Saskatoon-based, operating in the heart of North America's oilseed production region. Smart Earth work with the world's leading experts in oilseed breeding, agronomics and processing to deliver high quality Camelina at scale. Camelina is a highly sustainable source of omega 3. It can be produced on marginal lands and uses less water, fertilizers and chemicals as compared to other commonly produced oilseed crops such as flax and canola.

Products & Services

Camelina meal and oil products for the companion animal (food grade) and feed market from tote to rail car quantities. Smart Earth Camelina Oil is a high omega 3 oil at 38%, that also offers the ideal balance of omega 3 to 6 (2:1). These two features found together in one oil is what makes camelina stand out among omega oils. Its naturally occurring vitamin E provides antioxidant protection while also stabilizing the oil. Camelina has a 2-3 year shelf life, with low risk of oxidation rancidity.

Stonehenge Organics is a fourth-generation family farm, located in the heart of southern Saskatchewan, that has been producing and exporting high quality certified organic ingredients globally for many years. We specialize in providing the finest quality Non-GMO, organic certified pulses, oilseeds and cereals. With the addition of our on-farm state-of-the-art processing facility we are in full control of safety and quality assurance throughout the supply chain. The facility is third-party audited, GFSI certified and FSMA compliant. We offer infrared color sorting and x-ray technology to provide additional food safety confidence. Our premium quality organic ingredients are preferred by leading companies around the world. Being the farmer, processor and exporter, we offer you ease of mind with our high quality, safe and fully traceable ingredients. Certifications include: FSSC 22000 by AIB International, Bio-Suisse, European Union (EU), National Organic Program (NOP), Canadian Organic Regulation (COR) Kosher and Gluten Free.

Products & Services

High quality organic lentils, peas, brown and golden flax, canola and oats.
