About this Directory

Saskatchewan suppliers are reliable partners for contract manufacturing solutions across a variety of industries. Companies in the province provide comprehensive services, including custom fabrication, machining, product design, assembly, mechanical engineering, simulation testing, and value-added solutions to meet diverse client needs. Leveraging advanced technologies and skilled workforces, Saskatchewan's contract manufacturers deliver high-quality, cost-effective products that enhance operational efficiency, improve product performance, and reduce lead times. Capabilities span metal fabrication, plastics manufacturing, composite production, electronics integration, software development, and turnkey solutions. Saskatchewan-made products are built to perform in demanding environments while meeting global quality standards. Our manufacturers support key sectors such as agriculture, construction, mining, energy, transportation, aerospace, and defence. Saskatchewan's commitment to innovation, precision, and reliability ensures clients receive solutions that help them achieve their goals with confidence.

If you would like a direct introduction to any of the listed companies, please contact the STEP team member listed on this page, and they will be happy to assist.

Bridgeview Manufacturing, incorporated in 1988, has grown in size and strength to become a major manufacturing company in Western Canada with markets throughout the world. Through various expansions, their manufacturing facility has grown in excess of 70,000 sq. ft. including their state-of-the-art shot blast and powder coat facility. Bridgeview Manufacturing specializes in manufacturing products for the agriculture industry but with recent additions of new CNC manufacturing machinery, they are providing custom manufacturing and continually broadening their scope. The company's products are sold internationally with main markets in North America, Eastern Europe, and Australia. Hay equipment products include the Bale King bale processor, V-rake, and bale carriers. Grain handling products include bolt together hopper cones, the Grain Express grain loop, and other accessories. Earth moving products include Puldozer Landshaper blades and semi-mount scraper pans. Bridgeview also offers the Flexcart combine header transport trailers.

Products & Services

Cattle feeding and hay equipment, grain handling equipment, and bolted hopper cones, and earth moving products.

Calian Composites has expanded their current Saskatoon-based Arthur Rose location to over 30,000ft². The expansion brings the opportunity for increased production capabilities, as well as the ability to venture into new industries that would benefit from advantages of the innovative composite carbon fiber technology.

Calian Composites specializes in the design and production of large high-precision, carbon epoxy, satellite antenna structures. However, they are exploring any new markets that can leverage composite structures that are rustproof, corrosion-resistant, durable and have a high strength-to-weight ratio. They offer composites-specific engineering, metrology, project planning services and prototyping right through to full production of final products and assemblies.

"In industries like mining, the inherent corrosion protection and lightweight benefits of composites really shine and can provide some substantial cost savings if implemented correctly," added Rennie. "Saskatchewan companies have a heritage of providing local solutions and supporting each other. Having grown up in Saskatchewan, this is something I take great pride in and want our company to reinforce."

Products & Services

Composites-specific engineering, metrology and project planning services, right through to full component prototyping with production of final products and assemblies. Calian Composites currently works in the Defence, Marine/Naval and Civil markets and is expanding into Mining and Agriculture as well as general composites such as: kitting and cutting services, pattern and mold making, and rapid composite prototyping.

Established in 1992, Capital I Industries has been a pioneering leader in the development and manufacturing of a comprehensive range of grader-mounted and stand-alone road maintenance equipment. Our solutions are designed to optimize performance of all types of graders, ensuring efficient and effective road maintenance. Product lineup includes one-way snowplows, sod mulchers, U.S. / Canada patent state-of-the-art postless snow wings, brush and grass mowers, dozers, quick attaches and their newest additions, Capital I sloper / gravel reclaimer and road groomer. Capital I's facility is well over 30,000 sq ft, housing a machine shop with several experienced journeyman operators, including CNC milling and lathing. Also hosted onsite is CNC plasma cutting with experienced technicians, powder coat painting, and a full staff of well-trained welders and fabricators. The engineering department utilizes 3D-CAD modeling software for all product design, which reduces prototyping time and increases product manufacturing efficiencies. Capital 'I' has expanded its vision into the mining and exploration field, building and designing state-of-the-art mining equipment for above and below ground. Product under divisional company Irving Machine Inc. include exploration drilling equipment and oil and gas pipe handling equipment. Their shop is ISO and CWB certified.

Products & Services

Grader mount road maintenance equipment, above and below ground mining, exploration drilling equipment, and oil and gas pipe handling equipment.

The seeds of Dutch Industries were sown in the early 1930s in Holland where Pieter Cruson started a traditional blacksmith workshop. Pieter immigrated to Canada in 1950, and in 1952 Dutch Blacksmith Shop put down roots in Regina, Saskatchewan to provide quality steel products and services to local farmers and businessmen. This vision grew into Dutch Industries and eventually, Cruson passed the business on to his son and son-in-law, who took it to the next level. Now the third generation is taking the family business even further. Today, with over 70 years of experience, Dutch has been creating industry-leading seed and fertilizer openers with technologically advanced equipment in a 71,000-square-foot facility in Pilot Butte, Saskatchewan.

Dutch Industries continues to serve a growing list of agricultural and industrial customers from over eight countries on six continents. The founding values of Dutch Industries are alive, as they continue to uphold their motto: 'Quality for Generations.' Throughout its history, the company has accumulated a diverse portfolio of projects and experience in sectors including agriculture, heavy & light construction, automotive, heavy machinery, ground-engaging equipment, structural steel, electrical infrastructure, federal, provincial & municipal government contracts, military, and transportation.

Products & Services

Innovative OEM products for producers throughout North America and other parts of the world, including Dutch openers for seed and fertilizer application, manure spreaders, crop lifters, and chemical cab filters. Additionally, Dutch Manufacturing services include material profiling & forming, advanced CNC machining, advanced welding & fitting, powder coating & finishing, custom carbiding, and engineering. Dutch also provides material procurement, project management, supply chain management, assembly, warehousing, kitting, logistics and packaging.

DynaIndustrial is a fully integrated engineering and manufacturing company, specializing in large custom design/build projects, industrial equipment repair and medium volume manufacturing. DynaIndustrial's commitment to safety and quality is recognized in the following certifications: COR, ISNetworld, ISO 9001:2015 and CWB. DynaIndustrial provides; custom engineering/design, machining, welding, fabrication, and millwrighting services. In addition, they also manufacture/repair hydraulic cylinders and offer level 3 & 4 service rig inspections. Their global footprint includes the following industries: mining, pipe mills, steel mills, and oil and gas. For over 48 years, DynaIndustrial has been successfully solving these industries most challenging problems with innovative engineered designs, turnkey solutions and quality products that increase productivity, improve safety, and decrease maintenance downtime. DynaIndustrial is the manufacturer of the DynaBolter, a semi-automated single operator roof bolter. DynaIndustrial has also partnered with Broadbent. Together they provide the best centrifuge service and support in the mining industry.

Products & Services

Custom design and manufactured equipment for mines (roof bolters, chutes, ducts, centrifuges, miner components, etc.), steel mills (pinch roll consoles, transfer cars, furnace platforms, sideguides, etc.), pipe mills (pipe handling equipment, pipe double jointing lines, rotary plasma cutoffs, uncoilers, id welders, pipe collapse testers, etc.), and oil and gas (top drive components).

Since 1968 Pro Grain Equipment has been helping farmers to keep grain moving. Pro Grain Equipment is the manufacturer of the Pro Grain Bagger, Pro Grain Extractor, Pro Grain Bag Roller as well as a fab shop specializing in custom fabrication and repair. The first grain bagger was developed in 1986 for flexible, safe, cost-efficient grain storage in poly bags storing in excess of 10,000 bushels. The grain bag extractor is designed for fast, dependable, and efficient grain transfer from your grain bags to your transport truck, and the grain bag roller was developed to help manage the clean up of used grain bags with ease, baling the spent grain bags into a recycle ready bale. In addition to custom fabrication and repair, the shop offers machining, sandblasting, painting and portable welding services.

Products & Services

Wilger Industries is a major manufacturer of agricultural spray nozzles, nozzle bodies, and other spraying and liquid fertilizer application components. Wilger Industries Ltd. manufactures its products in Saskatoon, and with sister company in USA (Wilger Inc.) and newly established operation in Argentina (Wilger Argentina), sells its products around the world.

Wilger makes spray nozzles (COMBO-JET brand) for applicators who care how they spray, specializing and pairing with PWM spray systems since 1999. Wilger makes nozzle bodies and components (COMBO-RATE, COMBO-JET, etc.) that address and support best practises being developed in the crop protection industry. Wilger makes flow monitoring and liquid fertilizer metering components that are critical to maintaining effective and consistent application. More recently, Wilger has developed an electronic flow monitoring system and components that are to be integrated into OEM equipment or system manufacturer systems to provide consistent and quality components to highlight those systems they are integrated into.

Products & Services

A full and wide range of broadcast spray nozzles and parts, nozzle bodies in a variety of sizes and styles, as well as other sprayer plumbing components (such as those that would convert a sprayer boom to a recirculating sprayer boom).; two styles of sprayer tubing and connecting systems. A light-weight quick-nut system, as well as a more robust quick-flange sprayer plumbing system. Wilger also can supply pre-punched sprayer tubing to distributors and OEMs to make customized sprayer tubes; two product lines of liquid fertilizer monitoring parts. The first is a mechanical and visual flow indicator that can be stacked together to monitor each individual application row on any size of equipment. The second product line is the EFM system, a row-by-row electronic flow monitoring system that has a sensor on each individual row of product, providing feedback and alarms in the tractor cab for application monitoring.
