About this Directory

With over 40% of Canada's cultivated farmland, Saskatchewan is in a unique position to sustainably produce safe, high-quality agri-food products and ingredients.

We have a vibrant food and beverage processing industry meeting growing food demand worldwide, including commercial-scale canola crush and pulse processing operations. As a global leader in exporting agri-food products and the use of innovative, sustainable farming practices, Saskatchewan is primed to feed the world for generations.

If you would like a direct introduction to any of the listed companies, please contact the STEP team member listed on this page and they will be happy to facilitate the introduction.

Launched in 2012, Agrocorp Processing Ltd (APL) is headquartered in Moose Jaw, SK and is a wholly owned subsidiary of Agrocorp International. With its corporate office in Winnipeg, APL has 4 grain elevators and 1 protein extraction plant. Located in Moose Jaw and Cut Knife in Saskatchewan and Fahler and Innisfail in Alberta, the grain elevators have a combined 500,000MT export capacity for pulses such as lentils, peas, chickpeas, wheat, flax and canola. The protein extraction plant, located in Cut Knife processes pulses such as peas and lentils into protein and starch. All our facilities have the relevant safety and quality certifications. In addition to this, Agrocorp procures more than 1.5m additional tons of pulses, wheat and canola from Canada each year as part of its bulk shipment program. Headquartered in Singapore, Agrocorp operates in 16 countries, moves more than 12.5m MT of goods annually against sales in excess of USD 3.5b USD. In 2020, the company also launched a retail arm, Sansar & HerbYvore. Agrocorp recently launched its plant-based food line, HerbYvore.

Products & Services

Feed Grains, peas, lentils, oilseeds, grains as well as pea protein, starch and hull fibre.

AGT Food and Ingredients Inc. (AGT Foods) is a global leader in plant-based proteins and value-added processing of pulses, grains, staple foods and ingredients for export and domestic markets. AGT Foods was founded on the principle “From Producer to the World”, buying pulses such as lentils, peas, chickpeas and beans, durum wheat, grains, oilseeds and specialty crops from farmers around its facilities in Canada, Türkiye, the U.S., Australia, South Africa, India, China and Europe and processing and exporting its products to over one hundred countries around the world through its Saskcan and AGT Foods brands. AGT Foods operates production facilities across Western Canada as well as across the globe that features cleaning, calibration, peeling, splitting, colour sorting on a full line of pulses, durum wheat, wheat and grains, oilseeds, specialty crops and staple foods for containerized and bulk loading shipments. AGT Foods also produces a full range of plant-based PulsePlus™ food ingredient flours, proteins, starches and fibres through its pulse ingredient production facility in the United States.

Products & Services

Bulk pulses (split and whole lentils, chickpeas, peas, beans), pulse ingredients (flour, protein, starch and fibre), finished pulse goods including texturized pulse proteins, pulse-based pastas (including Veggipasta) and pulse-based breadings systems (including Veggicrumb), as well as wheat, durum wheat, canola and oilseeds, feed barley and specialty crops. Technical services centered on pulse research and development in food and industrial applications are also available.

BrewNature technology is designed to help reduce the amount of organic waste that ends up in landfills, which is a major contributor to greenhouse gas emissions worldwide. The BrewNature technology works by accelerating the natural process of composting, which usually takes 5-7 months to complete, down to just 5 days. The process involves breaking down organic waste using a combination of microorganisms and aerobic conditions.

Products & Services

In-vessel composting from 1 to 15 tonne units, water treatment and wastewater treatment.

Bridgeview Manufacturing, incorporated in 1988, has grown in size and strength to become a major manufacturing company in Western Canada with markets throughout the world. Through various expansions, their manufacturing facility has grown in excess of 70,000 sq. ft. including their state-of-the-art shot blast and powder coat facility. Bridgeview Manufacturing specializes in manufacturing products for the agriculture industry but with recent additions of new CNC manufacturing machinery, they are providing custom manufacturing and continually broadening their scope. The company's products are sold internationally with main markets in North America, Eastern Europe, and Australia. Hay equipment products include the Bale King bale processor, V-rake, and bale carriers. Grain handling products include bolt together hopper cones, the Grain Express grain loop, and other accessories. Earth moving products include Pulldozer Landshaper blades and semi-mount scraper pans. Bridgeview also offers the Flexcart combine header transport trailers.

Products & Services

Cattle feeding and hay equipment, grain handling equipment, and bolted hopper cones, and earth moving products.

Degelman designs and engineers high-performance equipment with one goal: to make a true impact on the farm. We do this by including practical features in our equipment that makes seeding and harvesting easier.

We focus on support and make the experience of owning a Degelman unlike any other. We are a well-established company, with deep roots in the agricultural industry manufacturing a broad range of farm equipment, including high performance- high speed tillage, legendary rock removal equipment, a full line of heavy harrows, land rollers, bulldozer blades, deep tillage, and manure spreaders.

We take exceptional pride in what we do and manufacture every piece of equipment with extreme focus and care.

Over the last 6 decades, there have been great advances in technology, but the foundation of Degelman remains the same: build simple, heavy, reliable equipment, that will last for generations. We choose to innovate rather than imitate and work hard to remain an industry leader. "Build it right, build it heavy and build it to last-from top to bottom".

Products & Services

Bulldozer blades, speed blades, strong box blades, land rollers, heavy harrows, (Pro-Till) High Speed Discs, rock diggers, rock pickers, rock rakes, rotary cutter technologies and manure spreaders.

Mark Wagner,
Supply Chain Manager
+1 306 533 3959
mark.wagner@secamelina.com

Smart Earth Camelina Corp. is the world's first and only fully integrated producer of Camelina. Smart Earth controls the entire production process from their proprietary Non-GMO seed variety to the grower's field and on to the processor. This ensures full traceability from farm to customer. The company is Saskatoon-based, operating in the heart of North America's oilseed production region. Smart Earth work with the world's leading experts in oilseed breeding, agronomics and processing to deliver high quality Camelina at scale. Camelina is a highly sustainable source of omega 3. It can be produced on marginal lands and uses less water, fertilizers and chemicals as compared to other commonly produced oilseed crops such as flax and canola.

Products & Services

Camelina meal and oil products for the companion animal (food grade) and feed market from tote to rail car quantities. Smart Earth Camelina Oil is a high omega 3 oil at 38%, that also offers the ideal balance of omega 3 to 6 (2:1). These two features found together in one oil is what makes camelina stand out among omega oils. Its naturally occurring vitamin E provides antioxidant protection while also stabilizing the oil. Camelina has a 2-3 year shelf life, with low risk of oxidation rancidity.

Xtended Hydraulics & Machine (Xtended) is a Saskatchewan owned hydraulics manufacturer and machine shop, offering a full range of custom machine and fabrication work. They manufacture and supply hydraulic cylinders and parts, which are both compatible with and superior to OEM parts for any brand and type of equipment. Their shop has both CNC and manual machines, a welding/fabrication area, heavy duty mechanics, as well as their own industrial hard chrome tank. They also offer on-site services, line boring, and portable machine capabilities. They choose to make customer service their priority, and in doing so, specialize in rush jobs. They cater to all types of work and no order is too big or too small for their capabilities. They take pride in being one of Saskatchewan's only Aboriginal/Metis owned and operated custom machine and fabrication shops. Xtended Hydraulics and Machine is a proud member of the Canadian Council for Aboriginal Business and SIMSA. They are ISO, ISNet certified and ALI Certified.

Products & Services

Xtended include hydraulic cylinder and equipment repair, rebuild and manufacturing, custom CNC and manual machining, fabrication, hard chrome plating, design and engineering services, and mining equipment sales, service and development. Additionally, Xtended is Controlled Goods Certified and offers design, machining, and fabrication services for controlled components and assemblies. Some of Xtended's major in-house projects include an innovative pipeline injection system called the X-Quill, as well as a unique RFID based asset management and tracking system.

Saskatchewan Trade and Export Partnership (STEP) Inc., is a member-driven, non-profit corporation dedicated to increasing Saskatchewan's export activities and raising awareness of Saskatchewan's distinct products and services.

Linking Buyers with Saskatchewan Suppliers:

STEP is your direct connection to a wide range of Saskatchewan's high-quality products and services: agriculture & food, biotechnology, agricultural & industrial equipment, natural resources, professional services, building products, environmental solutions...and the list goes on. As a complimentary service for you, STEP can help match you with Saskatchewan exporters who meet your needs.
