About this Directory

Saskatchewan's aerospace and defence sector is a hub of innovation, delivering advanced manufacturing, engineering, and technology solutions across land, naval, air, and space systems. From modular infrastructure for command centers and secure storage facilities to precision components for naval vessels, armoured vehicles, and aircraft landing gear systems, Saskatchewan companies excel in supporting critical defence operations.

The sector also offers expertise in mobile utility and treatment systems, energy management, emergency response technologies, and cybersecurity services. With capabilities extending to large-scale structures, automation, and simulation technologies, Saskatchewan businesses and research institutions, supported by Saskatchewan Trade & Export Partnership (STEP), are meeting the complex needs of global defence and aerospace markets through quality-driven solutions and collaborative global partnerships.

If you would like a direct introduction to any of the listed companies, please contact the STEP team member listed on this page, and they will be happy to assist.

ABC Canada Technology Group Ltd. is a world leader in ventilation products for mine, tunnel and industrial applications.

Their vertically integrated ISO certified manufacturing facilities produce industrial textiles, fabrics, and ventilation products.

ABC's mining and tunneling offerings consist of flexible fabric ducting, semi-rigid ducting, engineered inflatable stoppings, high-efficiency fans, silencers, tech services and more. Industrial ducting is manufactured for construction, aviation, military, special events and oil & gas applications. This extensive catalogue is the result of over half a century of research, innovation, and industry experience in more than 50 countries.

Products & Services

Flexible ducting for hot air, cool air, dehumidifying, light material handling and fresh air. Ducting accessories including wyes, tees, end caps, couplings, grounding wires, rock armor geogrid mesh and more. Custom accessories including covers and tarps.

BrewNature technology is designed to help reduce the amount of organic waste that ends up in landfills, which is a major contributor to greenhouse gas emissions worldwide. The BrewNature technology works by accelerating the natural process of composting, which usually takes 5-7 months to complete, down to just 5 days. The process involves breaking down organic waste using a combination of microorganisms and aerobic conditions.

Products & Services

In-vessel composting from 1 to 15 tonne units, water treatment and wastewater treatment.

Calian Composites started in 2015 as a research branch of Calian, Advanced Technologies, to investigate composite production use in large aperture antennas for the SATCOM industry. Today, we have 30,000 ft² of manufacturing space, with over 50 engineering and fabrication staff.

We offer closed molded composites-specific engineering, metrology, and project planning services, right through to full component prototyping with production of final products and assemblies. Engineering capabilities embrace the use of industry leading CAD, FEA, and metrology packages. Composites have a high strength-to-weight ratio. Carbon fiber is about 75 percent lighter than steel and about 30 percent lighter than aluminum. Fiberglass is about 60% lighter than steel and about 20% lighter than aluminum, yet both are much stronger than both materials by weight.

Products & Services

Composites-specific engineering, metrology and project planning services, right through to full component prototyping with production of final products and assemblies. Calian Composites currently works in the Defence, Marine/Naval and Civil markets and is expanding into Mining and Agriculture as well as general composites such as: kitting and cutting services, pattern and mold making, and rapid composite prototyping.

Established in 1992, Capital I Industries has been a pioneering leader in the development and manufacturing of a comprehensive range of grader-mounted and stand-alone road maintenance equipment. Our solutions are designed to optimize performance of all types of graders, ensuring efficient and effective road maintenance. Product lineup includes one-way snowplows, sod mulchers, U.S. / Canada patent state-of-the-art postless snow wings, brush and grass mowers, dozers, quick attaches and their newest additions, Capital I sloper / gravel reclaimer and road groomer. Capital I's facility is well over 30,000 sq ft, housing a machine shop with several experienced journeyman operators, including CNC milling and lathing. Also hosted onsite is CNC plasma cutting with experienced technicians, powder coat painting, and a full staff of well-trained welders and fabricators. The engineering department utilizes 3D-CAD modeling software for all product design, which reduces prototyping time and increases product manufacturing efficiencies. Capital 'I' has expanded its vision into the mining and exploration field, building and designing state-of-the-art mining equipment for above and below ground. Product under divisional company Irving Machine Inc. include exploration drilling equipment and oil and gas pipe handling equipment. Their shop is ISO and CWB certified.

Products & Services

Grader mount road maintenance equipment, above and below ground mining, exploration drilling equipment, and oil and gas pipe handling equipment.opportunity in the region.

Greenwave delivers data-driven, energy management solutions for commercial, industrial, institutional and community buildings. Their permanently installed measurement devices allow the company to continually identify and prioritize the opportunities and guide their clients through a sequential electrical, natural gas and water conservation process. While identifying the ROI based opportunities, Greenwave will measure and verify the utility savings and GHG emission reduction results. Greenwave's open architecture platform allows real-time data to integrate into existing building management systems offering performance based control and predictive maintenance alerts. These benefits enhance life safety and emergency readiness systems such as the real-time identification, notification and resolution of water and natural gas leaks. Energy conservation projects lead to great stories. As such, Greenwave provides digital public engagement dashboards that display strategic project messaging, live performance metrics and easy to comprehend conservation results.

Products & Services

Energy management software combining real-time water/gas/electrical consumption, energy efficiency portfolio planning, environmental and climate action planning, ESG consulting, data and operation consulting, internal operator dashboard, maintenance alerts on critical assets, leak detection alerts on water and gas, safety alerts , and public facing interactive dashboard.

WRT Equipment Ltd. has been serving the road and mining industries since 1975. They manufacture and distribute construction equipment products used by contractors in road related construction and in the mining industry. WRT manufactures aggregate equipment that includes conveyors, inclined and horizontal vibrating screens, portable cones, jaw and screen plants, and compaction equipment. WRT also manufactures asphalt plants and related equipment, feeder plants, screen plants and pull type pneumatic tire rollers. Manufacturing has diversified with the addition of the tandem and triple axle end dump gravel trailers to the product line up. WRT's focus on quality built equipment providing a long service life, blended with excellent service, is WRT's foundation for success. WRT Equipment provides customer support for replacement parts, accessories and service, and is also a dealer for Powerscreen, FLSmidth-Excel LLC, and Tecnetics Industries Inc.

Products & Services

Construction equipment products, conveyors, crushers, asphalt plants, compaction equipment, and more.

Xtended Hydraulics & Machine (Xtended) is a Saskatchewan owned hydraulics manufacturer and machine shop, offering a full range of custom machine and fabrication work. They manufacture and supply hydraulic cylinders and parts, which are both compatible with and superior to OEM parts for any brand and type of equipment. Their shop has both CNC and manual machines, a welding/fabrication area, heavy duty mechanics, as well as their own industrial hard chrome tank. They also offer on-site services, line boring, and portable machine capabilities. They choose to make customer service their priority, and in doing so, specialize in rush jobs. They cater to all types of work and no order is too big or too small for their capabilities. They take pride in being one of Saskatchewan's only Aboriginal/Metis owned and operated custom machine and fabrication shops. Xtended Hydraulics and Machine is a proud member of the Canadian Council for Aboriginal Business and SIMSA. They are ISO, ISNet certified and ALI Certified.

Products & Services

Hydraulic cylinder and equipment repair, rebuild and manufacturing, custom CNC and manual machining, fabrication, hard chrome plating, design and engineering services, and mining equipment sales, service and development. Additionally, Xtended is Controlled Goods Certified and offers design, machining, and fabrication services for controlled components and assemblies. Some of Xtended's major in-house projects include an innovative pipeline injection system called the X-Quill, as well as a unique RFID based asset management and tracking system.
