About this Directory

Saskatchewan suppliers are at the forefront of delivering innovative solutions to the global construction industry. Companies across the province provide a wide range of products, technologies, and services designed to improve productivity, enhance safety, and boost operational efficiency. Saskatchewan's construction sector offers solutions across key areas, including heavy equipment and machinery, structural components, site preparation and earthmoving technologies, compliance and safety solutions, fluid management systems, as well as construction technology, software, and support services. Built to endure extreme climates and challenging environments, Saskatchewan-made products and solutions are recognized for their durability, innovation, and reliability. With expertise supporting civil, industrial, electrical, and infrastructure projects, Saskatchewan companies are committed to helping clients maximize performance while meeting the evolving needs of the construction industry through sustainable and efficient solutions.

If you would like a direct introduction to any of the listed companies, please contact the STEP team member listed on this page, and they will be happy to facilitate the connection.

ABC Canada Technology Group Ltd. is a world leader in ventilation products for mine, tunnel and industrial applications.

Their vertically integrated ISO certified manufacturing facilities produce industrial textiles, fabrics, and ventilation products.

ABC's mining and tunneling offerings consist of flexible fabric ducting, semi-rigid ducting, engineered inflatable stoppings, high-efficiency fans, silencers, tech services and more. Industrial ducting is manufactured for construction, aviation, military, special events and oil & gas applications. This extensive catalogue is the result of over half a century of research, innovation, and industry experience in more than 50 countries.

Products & Services

Flexible ducting for hot air, cool air, dehumidifying, light material handling and fresh air. Ducting accessories including wyes, tees, end caps, couplings, grounding wires, rock armor geogrid mesh and more. Custom accessories including covers and tarps.

Bindapt+

Visual Farm Dashboard

Adaptive Agriculture Solutions is best known for its thermostatically controlled in-bin grain drying system that uses its patented adapter plate transitions to control the supply of supplemental heat to grain bins. The company's technology has progressed in producing a series of Internet of Things (IoT) sensors attached to a grain bin to improve grain drying efficiencies through computer automation that turns any grain bin into an efficient grain drying and conditioning system. Adaptive Agriculture is headquartered out of Saskatoon, Saskatchewan (Canada), and has clients across the western prairie provinces and into the northern USA.

Products & Services

Both cellular based and Wifi connected devices for grain bin monitoring and conditioning. The Bindapt series of products features incoming air plenum temperature and humidity and static pressure sensors as well as the ability to monitor in bin grain cables, or its patented segmented in grain sensor "Binstick". The bindapt products can either be rooftop or ground level mounted, and come with a 110-220 volt power supply, or 12 volt DC powered solar / battery pack system. One or Two output modules can optionally control supplemental heaters, or offer a relay pack aeration fan control system, or rooftop exhaust fan systems. Other grain bin sensors, such as upper air Temperature, Humidity, CO2, and Lidar level are available as well. The system comes with an extensive Virtual Bin Inventory management system, as well as a fully traceable "from field to bin" team based program which allows multiple farm members to access and manage the systems and take control of this years crop plan.

Agremote has invented and marketed products since 1997 including remote control grain trucks and trailer chute openers and remote control swing auger movers. Their newest invention, the Boss load binder attachment has just finished 6 months of field testing and is ready for world wide distribution.

Products & Services

Remote control chute and hoist systems for grain trucks, remote control chute openers for hopper bottom grain trailers, remote control swing auger movers and remote control receivers to operate mechanical, hydraulic or air devices. Agremote Systems also specializes in replacement transmitter receivers. Their latest innovation is the Boss and Buddy load binder attachments which combine the reliability of the ratchet load binder with the speed and power of cordless drills and impacts to give you the quickest and easiest way to chain down a load.

Bridgeview Manufacturing, incorporated in 1988, has grown in size and strength to become a major manufacturing company in Western Canada with markets throughout the world. Through various expansions, their manufacturing facility has grown in excess of 70,000 sq. ft. including their state-of-the-art shot blast and powder coat facility. Bridgeview Manufacturing specializes in manufacturing products for the agriculture industry but with recent additions of new CNC manufacturing machinery, they are providing custom manufacturing and continually broadening their scope. The company's products are sold internationally with main markets in North America, Eastern Europe, and Australia. Hay equipment products include the Bale King bale processor, V-rake, and bale carriers. Grain handling products include bolt together hopper cones, the Grain Express grain loop, and other accessories. Earth moving products include Pulldozer Landshaper blades and semi-mount scraper pans. Bridgeview also offers the Flexcart combine header transport trailers.

Products & Services

Cattle feeding and hay equipment, grain handling equipment, and bolted hopper cones, and earth moving products.

Established in 1992, Capital I Industries has been a pioneering leader in the development and manufacturing of a comprehensive range of grader-mounted and stand-alone road maintenance equipment. Our solutions are designed to optimize performance of all types of graders, ensuring efficient and effective road maintenance. Product lineup includes one-way snowplows, sod mulchers, U.S. / Canada patent state-of-the-art postless snow wings, brush and grass mowers, dozers, quick attaches and their newest additions, Capital I sloper / gravel reclaimer and road groomer. Capital I's facility is well over 30,000 sq ft, housing a machine shop with several experienced journeyman operators, including CNC milling and lathing. Also hosted onsite is CNC plasma cutting with experienced technicians, powder coat painting, and a full staff of well-trained welders and fabricators. The engineering department utilizes 3D-CAD modeling software for all product design, which reduces prototyping time and increases product manufacturing efficiencies. Capital 'I' has expanded its vision into the mining and exploration field, building and designing state-of-the-art mining equipment for above and below ground. Product under divisional company Irving Machine Inc. include exploration drilling equipment and oil and gas pipe handling equipment. Their shop is ISO and CWB certified.

Products & Services

Grader mount road maintenance equipment, above and below ground mining, exploration drilling equipment, and oil and gas pipe handling equipment.

Degelman designs and engineers high-performance equipment with one goal: to make a true impact on the farm. We do this by including practical features in our equipment that makes seeding and harvesting easier.

We focus on support and make the experience of owning a Degelman unlike any other. We are a well-established company, with deep roots in the agricultural industry manufacturing a broad range of farm equipment, including high performance - high speed tillage, legendary rock removal equipment, a full line of heavy harrows, land rollers, bulldozer blades, deep tillage, and manure spreaders.

We take exceptional pride in what we do and manufacture every piece of equipment with extreme focus and care. Over the last 6 decades, there have been great advances in technology, but the foundation of Degelman remains the same: build simple, heavy, reliable equipment, that will last for generations. We choose to innovate rather than imitate and work hard to remain an industry leader. "Build it right, build it heavy and build it to last-from top to bottom".

Degelman. Engineered Tough.

Products & Services

Bulldozer blades, speed blades, strong box blades, land rollers, heavy harrows, (Pro-Till) High Speed Discs, rock diggers, rock pickers, rock rakes, rotary cutter technologies and manure spreaders.

Flexxifinger is the premier manufacturer of harvesting and seeding aid attachments. Varied line-up offers crop lifter solutions which can be customized to suit different crops, soil types, ground conditions and equipment. All of Flexxifinger's crop lifters attach to the header using the patented QD™ system, which, once installed, expedites the installation and removal of the lifters to less than 10 minutes per header. The Flexxifinger product line has evolved to include the Flexxifinger® Quicker Picker, a rotary rock picker that attaches to the front of any skid-steer or loader ideal for use in the agricultural, industrial, maintenance, mining, landscaping and forestry industries. Further to the unit itself, Flexxifinger is developing attachments to expand the possible uses of the Flexxifinger® Quicker Picker. Another innovative product is the Flexxifinger® Vibra-Screen™, this product will keep lumpy fertilizer flowing coming out of hopper bottom bins while simultaneously screening the product size to eliminate seeder fertilizer run blockages. The ideas driving Flexxifinger is pretty simple - create high quality, easy-to-use products that will assist clients. Flexxifinger will continue to design and manufacture innovative, efficient products to advance and enhance the agricultural industry. Lifting in the field, leading in the industry.

Products & Services

The manufacturing and/or sales of Flexxifinger® Crop Lifters, Flexxifinger® Quicker Picker Rock Picker, FlexxiSelect™ Relay Intercropping Harvest System™, Flexxifinger® Sunflower Pan™, Flexxifinger® Vibra-Screen™, and Flexxifinger® Multicrop Valve™.

Koenders Water Solutions Inc. are the world's leading innovator and manufacturer of water aeration systems and experts in affordable Water Management. Founded in 1988 to offer farmers and pond owners environmentally-friendly and cost-effective solutions to keep pond and dugout water clean, Koenders has over 100,000 customers across the globe. In the early 2000's, Koenders designed North America's first environmentally safe, chemical-free pond conditioner - Nature's Pond Conditioner™, an "all-in-one" and natural solution for the pond care market and is now Canada's #1 Natural Water Treatment brand. Koenders are respected experts in Water Management, providing cost-effective, natural solutions for Storm Water, Parks & Rec water, and Wastewater applications for over 30 years. Koenders has always been committed to the environment and determined to help drive change through its vision 'Living better and saving the Planet's water, Nature's Way'. Under the 'Nature's Pond' brand, it developed a line of commercial-grade cleaning products that starts to address the growing issue of water and environmental contamination head on. These products prevent contamination at the source by offering all-natural, chemical-free, non-toxic concentrated yet highly effective products for use on cleaning tasks and for treating plumbing, septic & sewage systems - "Simplifying the way we clean while protecting people and the environment".

Products & Services

Pond care equipment including windmill and electric aeration systems, solar aeration and water pumps, water fountains and natural treatments for ponds, lakes, sewage lagoons, plumbing and septic systems, a range of environmentally-safe cleaning products for the janitorial, commercial cleaning and restoration sectors, Water Management Consultancy and a unique program to treat and manage storm water, parks & rec water and waste water applications using renewable energy technology and natural treatment products.

Kramble Industries is a manufacturing company located in Saskatoon, Saskatchewan who specialize in the design and manufacturing of remote control systems used primarily in agricultural applications. The line of products includes the Remote Control Endgate & Hoist System, Remote Control movers for augers and conveyors Mover, Remote Control Trailer Chute Opener, the Wireless Full Bin Alarm as well as Remote Controlled Hydraulic Valves. The Remote Control Endgate and Hoist System provides remote control operation of the endgate and hoist on end dump grain truck boxes. The Remote Control Swing Auger Mover provides remote control operation of the swing away on a grain auger. The Remote Control Swing Belt Mover provides the same function for a conveyor belt. The Remote Control Trailer Chute Opener provides remote control operation to open and close the chutes of bottom dump grain trailers. The Wireless Full Bin Alarm is a wireless alarm system which signals an operator when a grain storage bin is approaching its capacity. Custom Engineering services are also available for the design and manufacture of multiple channel remote control systems to operate valves, pumps, contactors, relays, motors, etc.

Products & Services

Remote control agricultural systems.
