About this Directory

Saskatchewan exporters are trusted partners in delivering innovative solutions for government procurement needs across multiple sectors. They provide a diverse range of products, services, and technologies that support infrastructure development, public safety, energy, transportation, healthcare, defence, and environmental sustainability. Saskatchewan-based businesses offer expertise in areas such as advanced manufacturing, engineering, contract services, digital solutions, and integrated supply chain management. With a strong focus on quality, compliance, and cost-effective solutions, our suppliers ensure that government agencies and contractors receive reliable and high-performing products tailored to meet complex regulatory and operational requirements.

With a proven track record in delivering critical infrastructure projects, equipment, and technology-driven solutions, Saskatchewan companies are well-positioned to support municipal, provincial, federal, and international government procurement opportunities. Whether it's supplying heavy equipment, aerospace and defence solutions, IT and cybersecurity services, clean energy technology, water treatment systems, or precision-engineered components, Saskatchewan suppliers are committed to excellence, innovation, and long-term partnerships.

If you would like a direct introduction to any of the listed companies, please contact the STEP team member listed on this page, and they will be happy to facilitate the connection.

Andgo's Intelligent Automation Suite creates efficiencies and saves resources by automating major manual scheduling challenges, such as: shift filling, vacation processing, and absence onboarding. Andgo's suite of products is designed to simplify and streamline workflow processes for complex organizations, providing insights to fill more shifts faster, with the right people. This solution suite helps address some of the largest issues facing organizations today: labor shortages and employee engagement, satisfaction, and retention.

Products & Services

A comprehensive end-to-end suite or à la carte that includes: Smart Call - Automate the communication of available short call shifts to eligible employees, Vacation Mapping - Optimize employee vacation usage and reduce complex processing overhead, Enhanced Absences - Facilitate the employee request process online for planned and unplanned absences, Inform - Easily communicate to a curated list of employees, Quick Dial - Receive, route, and prioritize urgent incoming phone calls automatically, Shift Prebooking - Post and fill vacant shifts months in advance.

Axiom Exploration Group is an employee-owned company with its corporate head office located in Saskatoon, Saskatchewan. Established in 2011, Axiom Group is a complete consulting firm providing a diverse set of technical services within, and integrated across, each of the company's four main divisions: Exploration, Geophysics & Geomatics, Environment, and Energy Services. Axiom considers their consultation process as transformational rather than transactional, and pride themselves on their dedication and commitment to delivering outcomes that ensure the continued successes of their clients.

Products & Services

The ability to confidently facilitate the completion of any project (e.g., geological, environmental, and engineering) for clients in Saskatchewan, across western and northern Canada, and internationally. The company's experienced team consults globally with working visas and permits already in place in multiple countries. Axiom routinely works in logistically challenging and remote areas, and have experience adapting and succeeding in challenging geographic, environmental, and geopolitical circumstances.

Calian Composites has expanded their current Saskatoon-based Arthur Rose location to over 30,000ft². The expansion brings the opportunity for increased production capabilities, as well as the ability to venture into new industries that would benefit from advantages of the innovative composite carbon fiber technology.

Calian Composites specializes in the design and production of large high-precision, carbon epoxy, satellite antenna structures. However, they are exploring any new markets that can leverage composite structures that are rustproof, corrosion-resistant, durable and have a high strength-to-weight ratio. They offer composites-specific engineering, metrology, project planning services and prototyping right through to full production of final products and assemblies.

"In industries like mining, the inherent corrosion protection and lightweight benefits of composites really shine and can provide some substantial cost savings if implemented correctly," added Rennie. "Saskatchewan companies have a heritage of providing local solutions and supporting each other. Having grown up in Saskatchewan, this is something I take great pride in and want our company to reinforce."

Products & Services

Composites-specific engineering, metrology and project planning services, right through to full component prototyping with production of final products and assemblies. Calian Composites currently works in the Defence, Marine/Naval and Civil markets and is expanding into Mining and Agriculture as well as general composites such as: kitting and cutting services, pattern and mold making, and rapid composite prototyping.

Canada North Environmental Services (CanNorth) provides a full range of environmental services and is 100% First Nations owned by the Lac La Ronge Indian Band, Saskatchewan's largest band. They provide high quality, cost effective environmental services and since 1981 have completed nearly 4,000 projects, both nationally and internationally. Their clients include the world's largest mining companies, crown corporations, government, and well established oil and gas companies. CanNorth offers the technical skills and knowledge to deliver solutions for managing environmental risk in ways that benefit their clients, protect the environment, satisfy regulatory requirements, as well as support local communities through employment, training, and economic benefits. Projects are undertaken using defensible environmental study design, state-of-the-art technology for analyses, evaluation, and problem solving, and local Aboriginal participation. CanNorth has developed and implemented strong quality, environment, and safety management systems that meet or exceed international standards. In fact, CanNorth is the only First Nation's owned consulting company in the world to obtain ISO 9001, the international standard for quality management, ISO 14001, the international standard for environmental stewardship and management, and OHSAS 18001, the international standard for occupational health and safety certifications. CanNorth is also an ISNetworld registered company.

Products & Services

Environmental impact assessment, environmental effects monitoring, regulatory and licensing issues, human health and ecological risk assessments, environmental site assessments, aquatic toxicology, aquatic and fish studies, water quality investigations, hydrological assessments, wildlife investigations, wildlife and vegetation assessments, contaminant investigations, data management and analyses, habitat evaluation and restoration, archaeology/heritage resources, and forestry.

Established in 1992, Capital I Industries has been a pioneering leader in the development and manufacturing of a comprehensive range of grader-mounted and stand-alone road maintenance equipment. Our solutions are designed to optimize performance of all types of graders, ensuring efficient and effective road maintenance. Product lineup includes one-way snowplows, sod mulchers, U.S. / Canada patent state-of-the-art postless snow wings, brush and grass mowers, dozers, quick attaches and their newest additions, Capital I sloper / gravel reclaimer and road groomer. Capital I's facility is well over 30,000 sq ft, housing a machine shop with several experienced journeyman operators, including CNC milling and lathing. Also hosted onsite is CNC plasma cutting with experienced technicians, powder coat painting, and a full staff of well-trained welders and fabricators. The engineering department utilizes 3D-CAD modeling software for all product design, which reduces prototyping time and increases product manufacturing efficiencies. Capital 'I' has expanded its vision into the mining and exploration field, building and designing state-of-the-art mining equipment for above and below ground. Product under divisional company Irving Machine Inc. include exploration drilling equipment and oil and gas pipe handling equipment. Their shop is ISO and CWB certified.

Products & Services

Grader mount road maintenance equipment, above and below ground mining, exploration drilling equipment, and oil and gas pipe handling equipment.

Degelman designs and engineers high-performance equipment with one goal: to make a true impact on the farm. We do this by including practical features in our equipment that makes seeding and harvesting easier.

We focus on support and make the experience of owning a Degelman unlike any other. We are a well-established company, with deep roots in the agricultural industry manufacturing a broad range of farm equipment, including high performance - high speed tillage, legendary rock removal equipment, a full line of heavy harrows, land rollers, bulldozer blades, deep tillage, and manure spreaders.

We take exceptional pride in what we do and manufacture every piece of equipment with extreme focus and care. Over the last 6 decades, there have been great advances in technology, but the foundation of Degelman remains the same: build simple, heavy, reliable equipment, that will last for generations. We choose to innovate rather than imitate and work hard to remain an industry leader. "Build it right, build it heavy and build it to last-from top to bottom".

Degelman. Engineered Tough.

Products & Services

Bulldozer blades, speed blades, strong box blades, land rollers, heavy harrows, (Pro-Till) High Speed Discs, rock diggers, rock pickers, rock rakes, rotary cutter technologies and manure spreaders.

Flexxifinger is the premier manufacturer of harvesting and seeding aid attachments. Varied line-up offers crop lifter solutions which can be customized to suit different crops, soil types, ground conditions and equipment. All of Flexxifinger's crop lifters attach to the header using the patented QD™ system, which, once installed, expedites the installation and removal of the lifters to less than 10 minutes per header. The Flexxifinger product line has evolved to include the Flexxifinger® Quicker Picker, a rotary rock picker that attaches to the front of any skid-steer or loader ideal for use in the agricultural, industrial, maintenance, mining, landscaping and forestry industries. Further to the unit itself, Flexxifinger is developing attachments to expand the possible uses of the Flexxifinger® Quicker Picker. Another innovative product is the Flexxifinger® Vibra-Screen™, this product will keep lumpy fertilizer flowing coming out of hopper bottom bins while simultaneously screening the product size to eliminate seeder fertilizer run blockages. The ideas driving Flexxifinger is pretty simple - create high quality, easy-to-use products that will assist clients. Flexxifinger will continue to design and manufacture innovative, efficient products to advance and enhance the agricultural industry. Lifting in the field, leading in the industry.

Products & Services

The manufacturing and/or sales of Flexxifinger® Crop Lifters, Flexxifinger® Quicker Picker Rock Picker, FlexxiSelect™ Relay Intercropping Harvest System™, Flexxifinger® Sunflower Pan™, Flexxifinger® Vibra-Screen™, and Flexxifinger® Multicrop Valve™.

Greenwave delivers data-driven, energy management solutions for commercial, industrial, institutional and community buildings. Their permanently installed measurement devices allow the company to continually identify and prioritize the opportunities and guide their clients through a sequential electrical, natural gas and water conservation process. While identifying the ROI based opportunities, Greenwave will measure and verify the utility savings and GHG emission reduction results. Greenwave's open architecture platform allows real-time data to integrate into existing building management systems offering performance based control and predictive maintenance alerts. These benefits enhance life safety and emergency readiness systems such as the real-time identification, notification and resolution of water and natural gas leaks. Energy conservation projects lead to great stories. As such, Greenwave provides digital public engagement dashboards that display strategic project messaging, live performance metrics and easy to comprehend conservation results.

Products & Services

Energy management software combining real-time water/gas/electrical consumption, energy efficiency portfolio planning, environmental and climate action planning, ESG consulting, data and operation consulting, internal operator dashboard, maintenance alerts on critical assets, leak detection alerts on water and gas, safety alerts , and public facing interactive dashboard.

Their award winning software empowers engineers and asset managers to accurately assess funding needs, investigate implications of funding scenarios, and optimize the allocation of preservation budgets. Their software is unique to the markets they serve. IDS enterprise and cloud-based solutions help engineers and asset managers conquer the increasingly complex challenges, ensuring reliability and sustainability of public infrastructure systems. IDS services transportation agencies, municipalities, and water utilities, for them to make evidence-based decisions on the optimal replacement and rehabilitation of infrastructure systems.

Products & Services

Software guaranteed to generate truly optimal long term system-level renewal plans and long term solutions and services around four main product lines including Bridge Optimizer, Roads Optimizer, WaterNet Optimizer, and SewerNet Optimizer.

Innocorps develops dual-use (military and civilian) integrated base camp life support capabilities that provide water, wastewater, solid waste, and energy solutions for expeditionary bases or remote camp locations. By combining these separate material streams in a practical manner, we are able to achieve efficiencies that are not possible when each stream is addressed separately.

Products & Services

Circular City - an integrated utility system for reducing overall camp logistics related to water, waste, and energy; Factory-made power and water systems for communities of 5,000 and fewer residents; feasibility studies, design-build advisory, and fractional CTO consulting services with expertise in waste management, water management, off-grid energy solutions, and integrated utility systems.

Integral MAC is a company built on three generations of the Thiessen family. Manufacturing innovative products designed with practical solutions to oil and gas production is what they do best.

Their most recent innovations are the EcoTank and EcoTube. They combine to form the most energy-efficient, cost-effective fluid storage system available today, saving up to 80% of the energy required to heat the same fluid volume in conventional tanks.

Products & Services

Building production and facilities equipment for the oil and gas industry. A new, award-winning EcoTank and EcoTube are revolutionary innovations in storage tanks and tank heating systems. They also build conventional API 12F and API 650 storage tanks up to 2500 bbl, above ground storage ponds up to 82,000 bbl, H₂S bubble scrubbers, and more. They are continuously innovating new and improved solutions to enhance the Energy Industry.

Koenders Water Solutions Inc. are the world's leading innovator and manufacturer of water aeration systems and experts in affordable Water Management. Founded in 1988 to offer farmers and pond owners environmentally-friendly and cost-effective solutions to keep pond and dugout water clean, Koenders has over 100,000 customers across the globe. In the early 2000's, Koenders designed North America's first environmentally safe, chemical-free pond conditioner - Nature's Pond Conditioner™, an "all-in-one" and natural solution for the pond care market and is now Canada's #1 Natural Water Treatment brand. Koenders are respected experts in Water Management, providing cost-effective, natural solutions for Storm Water, Parks & Rec water, and Wastewater applications for over 30 years. Koenders has always been committed to the environment and determined to help drive change through its vision 'Living better and saving the Planet's water, Nature's Way'. Under the 'Nature's Pond' brand, it developed a line of commercial-grade cleaning products that starts to address the growing issue of water and environmental contamination head on. These products prevent contamination at the source by offering all-natural, chemical-free, non-toxic concentrated yet highly effective products for use on cleaning tasks and for treating plumbing, septic & sewage systems - "Simplifying the way we clean while protecting people and the environment".

Products & Services

Pond care equipment including windmill and electric aeration systems, solar aeration and water pumps, water fountains and natural treatments for ponds, lakes, sewage lagoons, plumbing and septic systems, a range of environmentally-safe cleaning products for the janitorial, commercial cleaning and restoration sectors, Water Management Consultancy and a unique program to treat and manage storm water, parks & rec water and waste water applications using renewable energy technology and natural treatment products.

Limbus AI is a software company focused on the development of products designed to improve efficiency in cancer diagnosis, treatment and follow-up. Limbus Contour, the company's first product, utilizes machine learning models to perform accurate and fast segmentation of organs at risk - a critical component of radiotherapy treatment planning. The product is simple to use, integrates with any planning platform, and produces high quality contours. Limbus AI specializes in developing state of the art machine learning algorithms trained on a world class proprietary database of expert validated medical images. Through close clinical partnerships the company has created a research, validation and market testing pipeline capable of bringing their initial software offering to a broad market while providing multiple avenues of development for future commercial products.

Products & Services

Limbus Contour, the company's first commercial product, which utilizes machine learning models to perform accurate and fast segmentation of organs at risk - a critical component of radiotherapy treatment planning. The quality of the contours produced is expert level and the significant time savings allows clinicians to spend more time on patient care. Compared to existing atlas-based automatic segmentation software, this product is much faster, simple to use, integrates with any platform, and produces accurate contours on a large library of normal organs. The product is approved for use in Canada, the US, the EU and other international markets.

Walter Michel founded Michel's Industries in 1970 and introduced tarpaulins for grain bodies to the agricultural market. Over the years Michel's have progressed to produce one of the top siderolling tarp systems on the market today. Innovative, user-friendly products and service, has kept Michel's Industries "The Tarp Specialists" for over 50 years. Along with siderolling tarps, Michel's have diversified with the addition of gravel tarp systems. A Dura and Econo flip tarp along with the gravel guard were introduced to the product line to fit gravel boxes and trailers. Michel's Industries also manufactures under hopper augers and conveyors, which mount underneath semi-trailers to act as a transfer auger for filling air drills or a swing auger at harvest, an electric combine cover for covering the grain tanks of newer style combines, The Crop Catcher, a shield which prevents seeds from being thrown over the back of combine/harvester headers by the retractable fingers of the auger drum, wireless remote operated chute openers and wireless remote operated gates, hoists and tarp systems.

Products & Services

Tarp systems for all applications, crop catcher, harvest pro-tech electric combine covers, hopper augers, conveyors, wireless chute openers, and shipping container roll up doors, trailer gear boxes for trailer landing gears and camera arms.

Titan's customers include mine sites for their carbon products and wood waste upcycling services. Titan Clean Energy has been a leader in pyrolysis technology and the advancement of biocarbon applications since 2008. The company is expanding into activated charcoal for filtration, carbon-based bioplastic inputs, compostable bioplastic masterbatches, as well as growing our consumer lines for livestock, horticulture and pet and household products. Product manufacturers that use our renewable biomaterials could realize significant savings over expensive fossil-based resins and fillers such as carbon black. The products are not only sustainable, but an effective carbon sink, and an avenue to help reach Canada's carbon-sequestration targets.

Products & Services

Titan Clean Energy Projects manufactures activated carbon and plastics additives from waste wood and agricultural waste biomass, with the following uses:

1. Water and wastewater purification, including PFAS removal
2. Odor control
3. Oil adsorption and site remediation
4. Animal feed additive for gut health
5. Plastics additive for UV protection, strength, and color and replacement for carbon black.

Vaccine and Infectious Disease Organization (VIDO)

The Vaccine and Infectious Disease Organization (VIDO) was established in 1975 at the University of Saskatchewan. VIDO is one of the largest most advanced containment facilities in the world with large animal containment level 2 and containment level 3 housing, and containment level 4 labs and animal housing in development. VIDO is renowned for establishing animal models of disease for both animal diseases and as models for human diseases.

Products & Services

Contract research and manufacturing for vaccines, antivirals and therapeutics for human and animal infectious diseases.

Western Heritage (WH), founded in 1990, provides innovative, science based solutions to its customers. WH does this by leveraging the extensive experience and deep expertise of their specialists. WH began with, and continues to offer Cultural Heritage Services including archaeology, community engagement and consultation, geoarchaeology and geophysics. We have added to our mapping and monitoring services and our extensive experience in satellite imagery. Our even newer UAV surveys utilize optical, lidar, multispectral and thermal sensors. Our EFMP software manages this data and provides actionable information on current and historical environmental conditions. It does this by leveraging a suite of machine learning models. WH also provides GIS and image interpretation services, digital terrain models, and other models for both UAV and satellite imagery (Maxar). WH is currently flying and analyzing agricultural fields for insured risks such as wildlife damage. WH, a Maxar Reseller, is ISO 9001:2015 certified, and has Energy Safety Canada COR.

Products & Services

Satellite imagery (Maxar), opusTrack and opusSchedule software, EFMP software, lidar management software, archeology and cultural heritage management, ground penetrating radar services, image interpretation, GIS mapping services, and UAV flights.

WRT Equipment Ltd. has been serving the road and mining industries since 1975. They manufacture and distribute construction equipment products used by contractors in road related construction and in the mining industry. WRT manufactures aggregate equipment that includes conveyors, inclined and horizontal vibrating screens, portable cones, jaw and screen plants, and compaction equipment. WRT also manufactures asphalt plants and related equipment, feeder plants, screen plants and pull type pneumatic tire rollers. Manufacturing has diversified with the addition of the tandem and triple axle end dump gravel trailers to the product line up. WRT's focus on quality built equipment providing a long service life, blended with excellent service, is WRT's foundation for success. WRT Equipment provides customer support for replacement parts, accessories and service, and is also a dealer for Powerscreen, FLSmidth-Excel LLC, and Tecnetics Industries Inc.

Products & Services

Construction equipment products, conveyors, crushers, asphalt plants, compaction equipment, and more.
